System Connections > Manage Details – New SFTP ANSI Configuration

Create an SFTP Setting for 204

- Name: unique name of the connection
- SFTP server hostname and port
- Message Format: ANSI X12
- Message Type: 204
- Known Host Key: click the button to dynamically pull it in. Note: If error most likely an IP whitelisting issue
- Folder location to put files in
- File Name - pattern example with variables: BN4L_204_%SHIPPER_LBN_ID%_%DOCUMENT_ID%_%TIMESTAMP%.edi

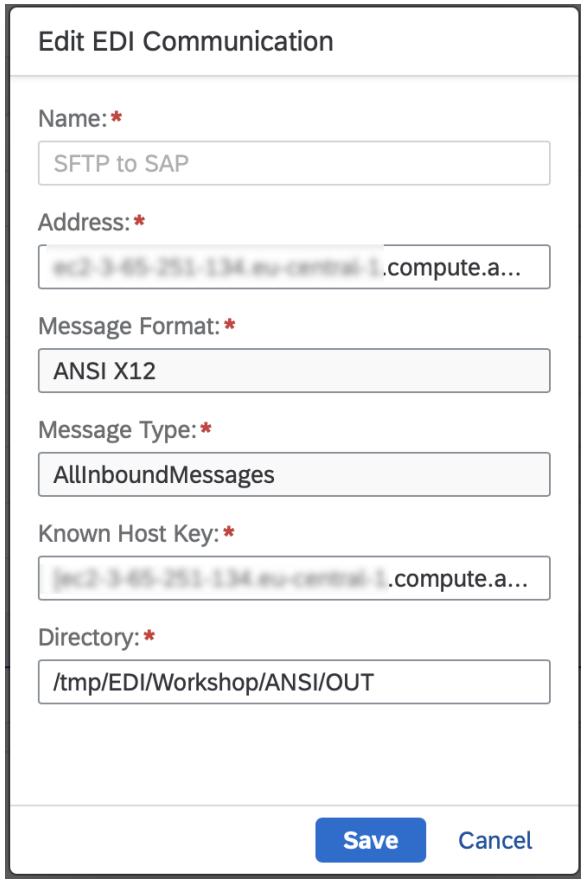

System Connections > Manage Details – New SFTP EDIFACT Configuration

Create an SFTP Setting for All Inbound Messages

- Name: unique name of the connection
- SFTP server hostname and port
- Message Format: ANSI X12
- Message Type: All Inbound Messages
- Known Host Key: click the button to dynamically pull it in. Note: If error most likely an IP whitelisting issue
- Folder location to pull files from

Note: Once done – put in support request to setup SFTP Pulling Schedule

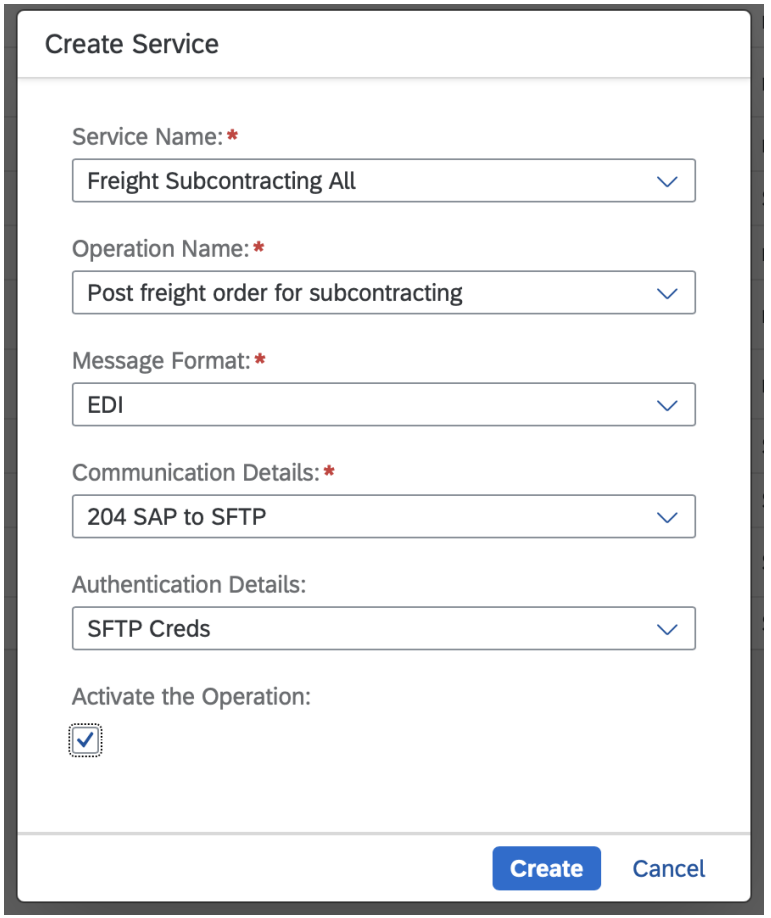

Note: Test & Production tenants must use different folders on SFTP server or different SFTP servers

System Connections > Create Services

Create Services for Outbound and Inbound EDI files

- Outbound 204
  - 3 services for Freight Subcontracting All
    - One for each operation: Post freight order for subcontracting, Put freight order for subcontracting, Post freight order for subcontracting cancellation
- Inbound Files
  - 1 Service: EDI Inbound All
  - Once created open support incident for SFTP Polling Schedule setup

ANSI EDI 204 – Important Segments/Fields – ISA / GS IDs

All segments / fields are important but these are the ones carriers need to be aware of

- **ISA/GS IDs** are the sender receiver IDs – we use the shipper and carrier LBN IDs for these.
- Also the ISA qualifier is **ZZ**

ISA*00* *00* ***ZZ*10020005414** *ZZ***10020005430**
*250331*1927*U*00401*000019862*0*P*>~

ANSI EDI 204 – Important Segments/Fields – ISA / GS IDs

The L11 segments listed here are very important for EDI response - 990, 214 and 210

- **L11 / 06** – is the system sender Id and must be sent back by all
- **L11 / CN** and **L11 / 12** are the SAP Business Partner IDs of the purchasing party (shipper) and the bill from party (carrier)
  – Required to be sent back in the 210
- They need to save these values on their side so they can be sent back later
