ANSI X12 EDI 210 – Invoice

ANSI X12 EDI 210 – Invoice

Submit an Invoice for 1 or more Freight Orders

- N9 segments very important!
  - N9/06: Sender System Id
  - N9/CN carrier business partner Id in TM
  - N9/12 shipper business partner Id in TM
  - Values found in 204
- Can send Flat Charges, Percentage Charges, Rate Based Charges (Ex: Per Mile)
- SAP 210 Spec

Carrier Success Story – Large NA Road Carrier

SAP Assisted Carrier with setting up EDI for a shipper.

One Year later they had 10 Shippers transacting through same EDI integration

- Proving the power of the network
- Carrier Quote: “It was easy to add new shippers to the integration – just had to take into account their LBN ID”

Agenda

Carrier Integration

- Integration Overview
- API Integration Details
- EDI ANSI X12 Integration
- **EDI EDIFACT Integration**
- Odds & Ends

Day 3

EDIFACT Overview

EDIFACT was defined in 1987 as a standard for global trade – Mostly used in Europe

- United Nations/Electronic Data Interchange for Administration, Commerce and Transport (UN/EDIFACT) is an international standard
- Segment Identifier at beginning of each line
- ' is end of line
- : data component separator
- + data element separator
- Each segment can have many components and each component can have many segments

System Connections – EDI Configuration

System Connections app is one stop shop for setting up carrier side integrations

- Main screen – define services you support (can also test on a test tenant)
- Connection Settings – define integration platform (always pick Multi-Cloud), and enable inbound connections
- Manage Details – define logical SFTP connections
- Manage Alternate IDs – see your tenants LBN ID, enter in alternate IDs like DUNS, SCAC, GLN, USDOT, etc
  – Not needed for carrier integrations

Service	Operation	Message Format	Communication Details	Authentication Details	Status
Freight Ocean Booking All	Post freight booking request	API	mockPipe	mockCred	Active
Freight Ocean Booking All	Freight Booking Shipping Instruction	API	mockPipe	mockCred	Active
Freight Ocean Booking All	Post freight booking request cancellation	API	mockPipe	mockCred	Active
EDI Inbound All	Pull EDI	EDI	SFTP to SAP	SFTP Creds	Active
Freight Subcontracting All	Post freight order for subcontracting	API	GeboPipe	mockCred	Active
Freight Subcontracting All	Put freight order for subcontracting	API	GeboPipe	mockCred	Active
Freight Subcontracting All	Post freight order for subcontracting cancellation	API	GeboPipe	mockCred	Active
Freight Tendering All	Post freight request for quotation	API	GeboPipe	mockCred	Active
Freight Tendering All	Post freight request for quotation cancellation	API	GeboPipe	mockCred	Active
Freight Tendering All	Post freight quotation notification	API	GeboPipe	mockCred	Active
Shipment Tracking All	Put order for tracking	API	Gebo Tracking Service	mockCred	Active
Shipment Tracking All	Delete order for tracking	API	Gebo Tracking Service	mockCred	Active

System Connections > Connection Settings – EDI Configuration

System Connections > Connection Settings where you configure integration platform and turn on inbound connectivity

- Integration Platform – **always pick Multi-Cloud** – Neo is deprecated. **Note**: if you know carriers still on Neo they need to migrate by mid May 2025!
- Inbound– turn on the switch if you want to send EDI responses
  – Select Multi-Cloud for integration platform
  – Select all provider APIs even though doing EDI
