Introduction

Welcome to SAP Business Network for Logistics! Your company has been invited to collaborate on the network by one of the business partners that you work with.

What is the network and what are the benefits of joining?

SAP Business Network for Logistics improves supply chain efficiency by connecting business partners on a collaborative network that supports jointly managing transactions, exchanging documents, and sharing insights across the value chain. For instance, upon invitation from a shipper, you – a carrier company – can activate your account on the network and collaborate with shippers on freight tendering, subcontracting, freight settlement, milestone reporting and dock appointment scheduling.

SAP Business Network for Logistics is a cloud solution that provides your company with a range of apps which you can use to complete your daily tasks. For more information, see Introduction to SAP Business Network for Logistics - Video.

This guide gives you information on how to activate your account for SAP Business Network for Logistics so you can sign in and start using the apps.

If you have any issues following the steps, start by reading Frequently Asked Questions.

Getting Started with SAP Business Network for Logistics via New Onboarding Process

This guide gives an overview of the simplified onboarding process designed for data contributors and carriers who are ready to use SAP Business Network for Logistics. It provides detailed procedures for activating your account on the network, creating your business profile, adding users, and connecting with the business partner that invited you.

Note

Instructions provided in this guide apply to both the production and test environments. If you're invited by a shipper or solution owner from the production environment, you can follow these instructions to onboard to the production environment. Similarly, if the invitation comes from the test environment, you can use the same steps to onboard to the test environment.

Note

Since release 2405, the account activation process for logistics providers has been simplified so that companies without an SAP Store account can also register as a carrier or data contributor on SAP Business Network for Logistics.

You, as a logistics provider (carrier or data contributor), will receive an invitation from a shipper or solution owner to start your simplified account activation process. However, if the invitation was sent before release 2405 - which is before June 1, 2024, for invitation senders using the Europe data center (EU10), and before July 1, 2024, for those using the United States data center (US20) - the previous account activation process still applies. For more information, see Getting Started (Prior to Release 2405).

If you have any issues performing the getting started tasks, see Frequently Asked Questions.

Note

To help you get started easily, most procedures described in this document are also presented with step-by-step screenshots on the Carrier Learning Portal under **Connect With Your Customer**:

- Getting Started
- Create Account
- Connect Existing Account
- Account Administration
- Get Support

Register (for Free) as a Carrier/Data Contributor on SAP Business Network for Logistics

This topic provides step-by-step instructions on how to complete the registration for SAP Business Network for Logistics.

Prerequisites

Your company has been invited to collaborate on the network by one of the business partners that you work with. As the administrator of your company, you've received the following invitation email. If you don't receive it, check your SPAM/Junk Mail box.

Email Subject / Sender	Purpose	Action to Take
<Company_Name_Of_Inviter> would like to connect with you on SAP Business Network From: noreply@us.bn.cloud.ariba.com	The email contains a link for registering an account on SAP Business Network for Logistics.	See the following procedure.

1. After you received an email invitation from a shipper or a solution owner, click **Get started** in the email message. When SAP Business Network for Logistics shows the welcome page, click **Create new account**.

   ### ℹ Note

   If the shipper or solution owner (inviter) has enabled “Replicate to global regions of SAP Business Network” in Profile Settings for cross-data-center connections, you, as the invitee, will be prompted to choose a designated data center where your company profile will initially be maintained. Keep in mind that, to increase the visibility of your company’s service coverage, capabilities, and strengths, your company profile will also be replicated to other data centers. If you do not want your profile to be replicated to other data centers, you have the option to abort the registration.

2. If you are creating a new account, verify the auto-populated email address and then click **Proceed**.

3. Follow the steps in the registration wizard.

   SAP Business Network asks for basic information about your business, such as your company name, address, and email address. You also create a username and password.

   The wizard performs automatic address validation to detect and correct any wrong or misspelled portion of a mailing address. A pop-up window shows a recommendation, which you can accept or reject.

   There is an ISO-based country- or region-specific drop-down list for state/province in the address section of the supplier profile. Select from the drop-down list (where available) instead of entering free text.

   ### ℹ Note

The person whose name is entered in the user account information section becomes the account administrator automatically. Account administrators can transfer the administrator role to another user later.

> **Note**
>
> When double byte non-Latin characters (such as Chinese) are detected in an address, a warning is displayed. A Latin character translation must then be provided by the user, which is also validated for correctness.

4. Read the terms of use, choose the check boxes if you agree to the terms, and then choose **Create account**.
5. (Optional) Print the **Summary** page for your records. You can also print the terms of use.

Results

You've registered an account on SAP Business Network. Additionally, you'll receive several emails as described in Follow-up Emails.

Follow-up Emails

After registering for SAP Business Network for Logistics, you will receive several follow-up emails from SAP Business Network.

These emails are sent from noreply@us.bn.cloud.ariba.com. Make sure your email software doesn't block these email addresses to avoid them going to your SPAM/Junk Mail box.

The table below shows the emails you should expect to receive and the actions to take after receiving them.

Email Subject / Sender	Purpose	Action to Take
Welcome to SAP Business Network From: noreply@us.bn.cloud.ariba.com	Notifies you that your SAP Business Network account has been created and your company's tenant on the network is ready to use. The email contains the following: • Your account information • The sign in URL (embedded in the **Sign in** button)	Proceed with the next task Sign In to SAP Business Network for Logistics.

Sign In to SAP Business Network for Logistics

This topic explains how to sign in to SAP Business Network for Logistics by clicking on the URL provided in the email *Welcome to SAP Business Network*, entering the user credentials, and accepting the terms and conditions. It also mentions that you can change the language displayed in the user interface.

Prerequisites

You've registered an account on SAP Business Network and received the emails described in Follow-up Emails.

Procedure

1. In the email *Welcome to SAP Business Network*, click the **Sign in** button.

   The sign-in page for the network is displayed.

   You're recommended to bookmark this URL so you can sign in more easily next time. Additionally, when you add more users to the network in the future, you need to send this URL to the new users.

2. On the sign-in page, enter your user credentials and click **Continue**.

   - **E-Mail**: enter the username listed in the email "*Welcome to SAP Business Network*".
   - **Password**: enter the password that you set when you activated the initial user.

3. Change your password and then choose **Save**.

4. Open the sign-in page (with the URL you bookmarked in Step 1) then use the new password to sign-in to the home page of SAP Business Network for Logistics.

5. You are prompted to update your account information. Choose **Update Now** in the pop-up window and then open the **Manage Business Profile** app to complete your company profile. To increase your visibility to future business partners, be sure your company profile is completed accurately. For more information, see Create Your Company Profile.

More Information

The main window for SAP Business Network for Logistics opens. To change the language displayed in the user interface, click the user icon in the upper-right corner and choose **Settings** > **Language & Region**.

> **Note**
> You, as the initial user and administrator of your company, can add additional administrators to help you complete the tasks hereafter. See Add Users for details.

Create Your Company Profile

You need to create your company profile for SAP Business Network for Logistics. The information in the profile is required to successfully connect to business partners. You also need to specify whether or not you'd like to make your profile visible to potential business partners and automatically accept connection requests. For detailed information, see Manage Business Profile.

Configure a Technical User (Optional)

A technical user is a token used for authentication and system connection. It is required only when you need to use the Write Service API provided by your solution owner on SAP Business Network for Logistics. You can create a technical user through the SAP ID service and maintain it in the **System Connections** app.

Context

> **Note**
> A technical user is only required when you need to use the Write Service API provided by the solution owner connected with you on the network. If you only want to use the APIs in the API Accelerator Hub (see APIs for SAP Business Network Global Track and Trace and APIs for SAP Business Network Freight Collaboration) or use the apps in the SAP Fiori Launchpad, skip this task.

A technical user is a role but not a person, nor a business user. It is a token used by selected services to access SAP Business Network for Logistics and authenticate system connection.

Procedure

Create a Technical User:

1. Go to the SAP ID service and create a user.

   Enter a unique email address that is not used by any of the users that you've created for SAP Business Network for Logistics.

   After registering the user, an email with the subject **Activate Your Account for SAP.com** will be sent to the email address.

2. Use the link in the email to activate the account.
3. On the **Personal Information** screen, note down the user ID, which starts with the letter P. You'll need it later.

Maintain the Technical User in the **System Connections** app:

4. Sign in to SAP Business Network for Logistics.
5. In the SAP Fiori Launchpad window, open the **System Connections** app.
6. Choose **Manage Alternate IDs**.
7. Add an alternate ID as follows:
   - **Type**: `Technical User`
   - **ID**: the email address of the technical user
8. Choose **Save**.

Add Users

As an administrator, you can add users to your company's tenant on the network. The users you add will be able to sign in to the network with their own sign-in details and use the apps relevant to their roles.

Procedure

1. Sign in to SAP Business Network for Logistics and open the **User Management** app.
2. Click **Add** on the right-hand side.
3. In the new entry, enter information about the user and assign user group(s) to the user. When you're finished, click **Save**.
   - Users assigned to the "...Admin" user group are administrators. They can perform administrative tasks using the following apps:
     - **Manage Business Profile**
     - **Retention Management**
     - **Blocking Store**
     - **Define User Settings**
     - **Manage Notification Settings**
     - **System Connections**

        - Manage Invitations
        - User Management
        - Manage Integration Logs
    - Users assigned to the "...All_Function" user group can access the following apps:
        - Retention Management
        - Blocking Store
        - Define User Settings
        - Manage Notification Settings
        - Manage Invitations
        - Manage Disputes
        - Freight Orders for Confirmation
        - Freight Orders for Reporting
        - Review Freight Documents
        - Invoice Freight Documents
        - Freight Quotations
        - Freight Requests for Quotation
        - Manage Invoices
        - Self-Book Dock Appointments
        - Manage Freight Execution

4. Choose Save.

Results

After adding a user, the user receives an email with the subject "*Activate Your Account for User Profile*" from ias@notifications.sap.com. The email contains a link to activate the user account, which is required for signing into the network.

ℹ Note

If the user already exists in SAP Business Network for Logistics, no activation email will be sent because the user was already activated for the network.

You need to send the network URL (see Sign In to SAP Business Network for Logistics) to the newly added users so they can sign in (after they've activated their user account).

ℹ Note

You can edit the user group assignment for a user in the **User Management** app by clicking the *Edit* icon for the user. The system will send an email to the user to notify the assignment change.

You can also delete a user by selecting a user and choosing **Delete** > **Delete User**. The deleted user can no longer access the apps in your company's tenant.

For more information, see the application help: User Management

Frequently Asked Questions

This section answers the questions that are frequently asked when you get started with SAP Business Network for Logistics, including questions with invitation emails, registering and getting an account, signing in, and getting support.

Invitation Email

A business partner has invited me to join SAP Business Network for Logistics but I didn't receive the invitation email. Why?

It is possible that your mail server blocked emails sent from noreply@us.bn.cloud.ariba.com. Try searching for the email in your SPAM/Junk Mail box.

Registering and Getting Account

What if my company needs more than one SAP Business Network for Logistics tenant?

If your company needs more than one tenant, please contact your dedicated SAP onboarding specialist.

Can I use the same user account to sign in to more than one SAP Business Network for Logistics tenant?

Yes, you can use one user account to sign in to multiple tenants. This can occur when an email address that was used in a previous registration receives a new invitation. If you use this email address to register on the network again (most likely with a new company name), the system will create a separate tenant for you. When using your account (email address) to sign in to the network, you can switch between tenants, identified by company names, from the **Switch Accounts** icon in the upper-right corner.

Important tips for using the same email across multiple registrations:

- User name: While you'll be asked to create a new user name (formatted as an email address) during registration, always use your original email address to sign in to the SAP Business Network for Logistics.
- Password: Similarly, you'll need to input a password again on the registration page. We recommend that you enter your original password. You have the option to enter a new password. But continue using your original password for sign-in purposes.

Signing In

What is the URL for signing in to SAP Business Network for Logistics?

The sign-in URL is included in the email titled *Welcome to SAP Business Network* (described in Follow-up Emails).

If you have added other users to your network (as described in Add Users), send the URL to them so that they can sign in with their own users/passwords.

What is the user name/password I should use to sign in to SAP Business Network for Logistics?

The initial user for the network is listed in the email titled *Welcome to SAP Business Network*. You can use this initial user (email address) and the password to sign in.

If you are not the initial user, your administrator can add you to the network. You'll receive an email with the subject "*Activate Your Account for User Profile*" from ias@notifications.sap.com. Click the activation link in the email to set a password. Then sign in with your email and password.

What if I don't know the URL for signing in to the network?

It is recommended that you keep the email that contains the sign-in URL (the email with the subject *Welcome to SAP Business Network*) or create a bookmark for the URL in your web browser.

What if I forget my password for signing in to SAP Business Network for Logistics?

On the sign-in page, click **Forgot Password**. You'll receive the instructions for resetting your password.

How can I reset my password?

On the sign-in page, click **Forgot Password**. You'll receive the instructions for resetting your password.

Getting Support

My company's admin user for SAP Business Network for Logistics has left. Can SAP add me as the new admin user?

Yes, we can add you as the admin user for your company. Please create a case on Ariba Help Center.

How to create a case (report an issue) and get support?

To create a case on Ariba Help Center, follow these steps:

1. Click the tile “SAP Business Network for Logistics – Carriers” under the **For Suppliers** section.
2. In the home page, try searching the knowledge base to get the answers for your issues first.
3. If the results still can’t resolve your issue, click **Get Support** > **Contact Support** at the left-hand navigation pane, then, follow the workflow provided:
    a. Within Step 1: Enter a full description of the issue.
    b. Within Step 2: Browse the AI-generated resources based on your description to see if you can find solutions to your issue. If not, click **Next** to proceed.
    c. Within Step 3: Confirm the details.

    > **Note**
    > When you report an issue that occurs in the onboarding process or some follow-up tasks related to onboarding, we recommend that you select **General** in the **Confirm your issue** field and then select the **Issue area** field from one of the following:
    >
    > - **Onboarding Services**: General issues that occur during the onboarding process.
    > - **Login**: Issues that occur during the login process.
    > - **Administration**: Issues that occur during the usage of apps related to business partners.
    > - **Carrier User Management**: Issues that occur during the usage of the User Management app and the Define User Settings app.

    d. Within Step 4: Provide contact information. Click **Webform** to provide the required contact information.

> **Note**
>
> If you've already received the ***Welcome to SAP Business Network*** email, please ensure that you enter your company's Business Network ID (BNO ID) in the **Account ID** field.

4. Submit the case.

After you create a case on the Ariba Help Center, our support team will contact you using the email address you provided in the case creation form. We recommend adding itsm.notification-service@sap.com to your mailbox's allowed senders list to ensure you receive all correspondence.

Do I have to provide an S-User ID when creating a case on Ariba Help Center?

No, you don't. You can create cases on Ariba Help Center as a guest user.

Getting Started (Prior to Release 2405)

This guide gives you an overview of information on how to get started with SAP Business Network for Logistics. It provides detailed procedures for activating your account on the network, creating your business profile, adding users, and connecting with the business partner that invited you.

> **Note**
>
> This section applies to logistics providers who received the invitation to the SAP Business Network for Logistics network before release 2405, which is before June 1, 2024, for invitation senders using the Europe data center (EU10), and before July 1, 2024, for those using the United States data center (US20). If the invitation you received was sent out after release 2405, see Getting Started with SAP Business Network for Logistics via New Onboarding Process.

If you have any issues performing the getting started tasks, see Frequently Asked Questions.

> **Note**
>
> You can also watch the Carrier Administrative Trainings videos to get step-by-step overview on account activating and administration.

Register (for Free) SAP Business Network for Logistics in SAP Store

This topic provides step-by-step instructions on how to complete the registration for SAP Business Network for Logistics.

Prerequisites

Your company has been invited to collaborate on the network by one of the business partners that you work with. As the administrator of your company, you've received the following invitation email. If you don't receive them, check your SPAM/Junk Mail box.

Email Subject / Sender	Purpose	Action to Take
Invitation to Join SAP Business Network Logistics Provider, basic membership	The email contains an SAP Store URL and a PO number for registering SAP Business Network for Logistics.	See the procedure below.
