Email Subject / Sender	Purpose	Action to Take
From: saplbn@mailsap.com		

ℹ Note

The PO number in the invitation email can be used for registering one tenant for SAP Business Network for Logistics. If your company needs more than one tenant, please contact your dedicated SAP onboarding specialist.

Procedure

1. In the invitation email, click the SAP Store URL.

   The URL takes you to the **SAP Business Network Logistics Provider** solution page in SAP Store.

2. On the solution page, click **View Pricing**, and then click **Start Now**.

   If you haven't signed in to SAP Store, this opens the **Sign In** page. If you've already signed in, proceed with Step 4.

3. On the **Sign In** page for SAP Store, do either of the following:

   - If your company has already got an account for SAP Store, sign in.
   - If your company doesn't have an SAP Store account, click **Register** to register an SAP Store account and follow the on-screen instructions to add company details.

     You'll then receive the emails as shown below. If you don't receive them, check your SPAM/Junk Mail box. In both emails, click the link to activate your account.

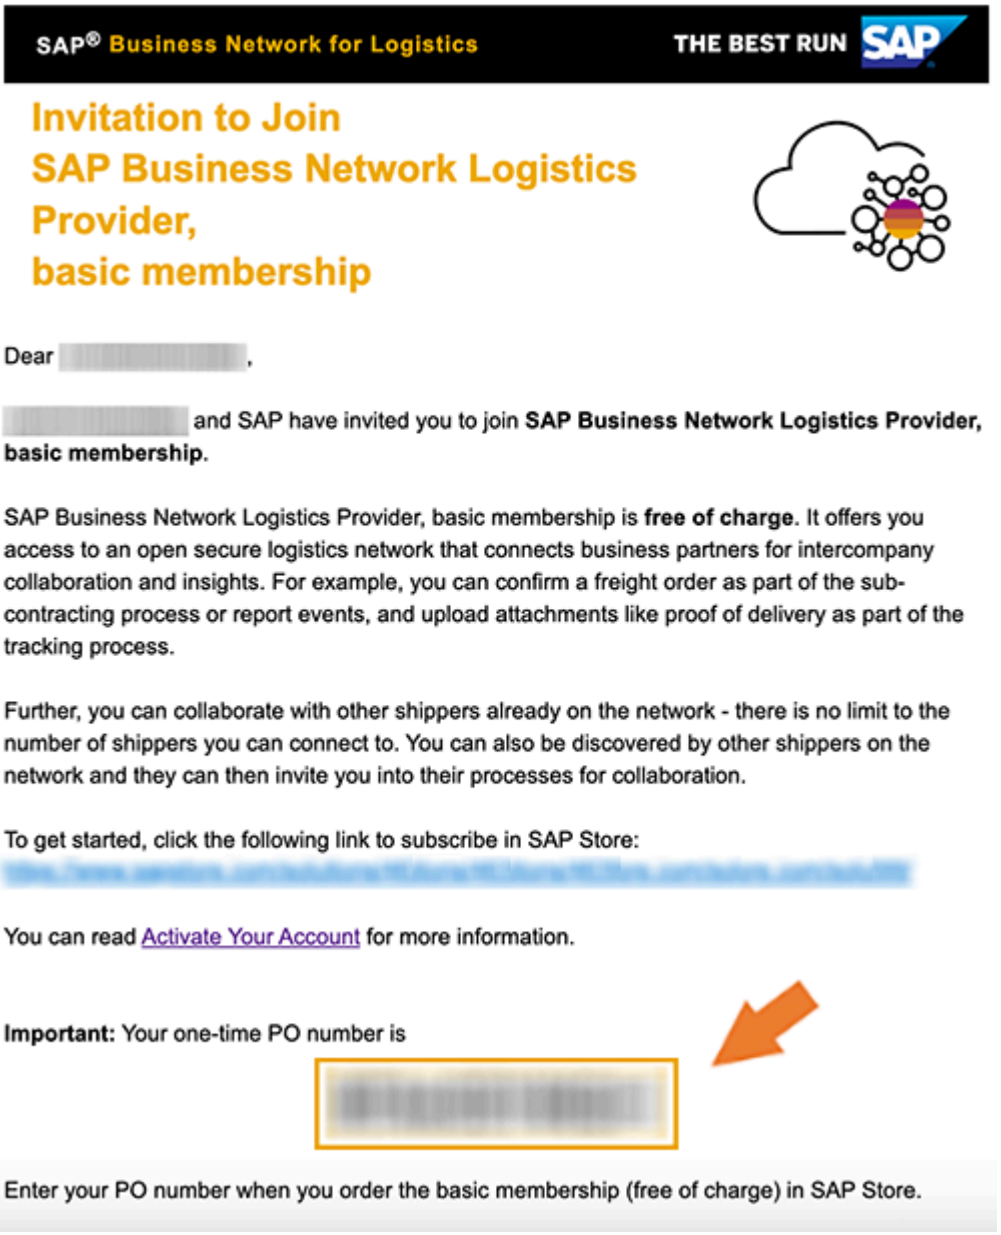

Email Subject / Sender	Purpose	Action to Take
Activate Your Account for SAP Store From: ias@notifications.sap.com	Notifies you that an SAP Store account has been created for your company, and you need to activate the account.	Click the link in the email to activate your SAP Store account.
[PRIVATE] Your key to the SAP ecosystem From: notification-service@sap.com	By activating this account, your company gets a unique S-User ID for obtaining SAP services and support.	Click the link in the email to activate your S-User account. It is recommended that you take note of this S-User ID. You'll need it for obtaining SAP support in the future.

4. When you are on the **Configure SAP Business Network Logistics Provider** page, select contract terms and click **Add to Cart**. Make sure the start date is not in the past.
5. Confirm the order items and click **Check Out**.
6. On the checkout page, do the following:

   - **Account Details**: this part is automatically filled. Please note the email address under **Buyer Details**. The welcome emails that you'll receive for accessing SAP Business Network for Logistics will be sent to that email address. If you want the emails to be sent to another person, you can add a technical contact here.
   - **Payment**: the basic membership for SAP Business Network for Logistics is free of charge. Select **Invoice** and add tax information.
   - Click **Continue to Checkout Review**.

7. On the **Review Order Details** page, fill in the PO number and click **Place Order**.

The PO number is provided in the invitation email mentioned above in “Prerequisites.” Note that the invitation email may be sent in different languages. The below example shows where to find the PO number in an English invitation email.

SAP® Business Network for Logistics THE BEST RUN SAP

Invitation to Join
SAP Business Network Logistics
Provider,
basic membership

Dear [redacted],

[redacted] and SAP have invited you to join **SAP Business Network Logistics Provider, basic membership.**

SAP Business Network Logistics Provider, basic membership is **free of charge.** It offers you access to an open secure logistics network that connects business partners for intercompany collaboration and insights. For example, you can confirm a freight order as part of the sub-contracting process or report events, and upload attachments like proof of delivery as part of the tracking process.

Further, you can collaborate with other shippers already on the network - there is no limit to the number of shippers you can connect to. You can also be discovered by other shippers on the network and they can then invite you into their processes for collaboration.

To get started, click the following link to subscribe in SAP Store:
[redacted]

You can read Activate Your Account for more information.

Important: Your one-time PO number is [redacted]

Enter your PO number when you order the basic membership (free of charge) in SAP Store.

Results

You'll receive several welcome emails as described in the next topic Welcome Emails. You receive these emails because your email address was provided in **Buyer Details** in Step 6.

Related Information

Frequently Asked Questions

Welcome Emails

After registering for SAP Business Network for Logistics in SAP Store, you will receive several emails from SAP. These emails include notifications about your order, activation of your user account, access information for the network, and a welcome email from the SAP customer onboarding team.

The emails are sent from notification@sap.com, ias@notifications.sap.com, no.reply.provisioning@sap.com, and engage-sap@mailsap.com. Make sure your email software doesn’t block these email addresses to avoid them going to your SPAM/Junk

Mail box.

The table below shows the emails you should expect to receive and the actions to take after receiving them.

If you don't have access to the emails listed here, see Frequently Asked Questions.

	Email Subject / Sender	Purpose	Action to Take
#1	SAP Store: Order request received From: notification@sap.com	Notifies you that your order has been received/processed.	None.
#2	SAP Store: Your order is now fully processed From: notification@sap.com		
#3	Activate Your Account for User Profile From: ias@notifications.sap.com	Notifies you that the initial user account for SAP Business Network for Logistics has been created for you, and you need to activate the account. This is the initial user for signing on to SAP Business Network for Logistics. This user is also listed in the access information email below.	In the email, choose **Click here to activate your account** to activate the account and set password.
#4	Access information for SAP Business Network for Logistics From: no.reply.provisioning@sap.com	Notifies you that your company's tenant in the SAP Business Network for Logistics is ready to use. The email contains the following: • URL for initial user: this is the specific URL for your company to sign in to SAP Business Network for Logistics; and • Initial user name: this is the initial user to sign in to SAP Business Network for Logistics.	Proceed with the next task Sign In to SAP Business Network for Logistics.
#5	Welcome to SAP Business Network for Logistics! From: SAP Customer Onboarding Team (engage-sap@mailsap.com)	Provides information on SAP customer onboarding support.	None. The information is for your reference.

Frequently Asked Questions

Sign In to SAP Business Network for Logistics

This topic explains how to sign in to SAP Business Network for Logistics by clicking on the URL provided in the access information email, entering the user credentials, and accepting the terms and conditions. It also mentions that you can change the language displayed in the user interface and that your company's business profile can be maintained rightly after the sign in or later.

Prerequisites

You've received email #3 and #4 described in Welcome Emails and activated the initial user for SAP Business Network for Logistics.

Procedure

You can watch a short video *Sign In After Registration* in Carrier Administrative Trainings to get step-by-step overview of the procedure.

1. In the access information email, click the https URL under **1. Your User Name**.

   The sign-in page for the network is displayed.

   → Recommendation

   You're recommended to bookmark this URL so you can sign in more easily next time. Additionally, when you add more users to the network in the future, you need to send this URL to the new users.

2. On the sign-in page, enter your user credentials and click **Sign In**.
   - **E-Mail or User Name**: enter the initial user name (email) listed in the access information email under **1. Your User Name**.
   - **Password**: enter the password that you set when you activated the initial user.
3. Read and accept Terms and Conditions. You'll not be able to access and use SAP Business Network for Logistics without accepting the terms.

Results

The main window for SAP Business Network for Logistics opens. To change the language displayed in the user interface, click the user icon in the upper-right corner and choose **Settings** > **Language & Region**.

A message box displays reminding you that your company's business profile is incomplete. You can choose **Open Manage Business Profile App** in the message box to perform the next task Create Your Company's Business Profile, or do it later.

ℹ Note

You, as the initial user and administrator of your company, can add additional administrators to help you complete the tasks hereafter. See Add Users for details.

Related Information

Frequently Asked Questions

Create Your Company's Business Profile

You need to create your company's business profile for SAP Business Network for Logistics. The information in the profile is required to successfully connect to a business partner. To create the profile, sign in to the network and open the **Manage Business Profile** app. Enter your company's name, address, and contact details, and specify whether or not you'd like to make your profile visible to potential business partners and automatically accept connection requests.

Procedure

You can watch a short video *Manage Business Profile App* in Carrier Administrative Trainings to get step-by-step overview of the procedure.

1. Sign in to SAP Business Network for Logistics using the URL that you bookmarked in the previous task.
2. In the SAP Fiori Launchpad window, a message box opens reminding you that your company's business profile is incomplete. Choose **Open Manage Business Profile App** in the message box.
3. In the **Manage Business Profile** app, click **Edit** in the upper right-hand corner.
4. In the **Header** and **Contact Details** sections, enter a company name, address, and business contact person. To enter address and business contact, click **Add** on the right-hand side.
5. In the **Privacy Settings** section, specify the following:
    - **Make my business profile visible to potential business partners** is by default **No**, which means your business profile is not visible to any company in SAP Business Network for Logistics.

      If you set it to **Yes**, your business profile will be visible to potential business partners in SAP Business Network for Logistics. They can then find you in the network and invite you to connect to them.

    - **Automatically accept connection requests (invitations)** is by default **No**, which means when you receive a connection request from an inviter in SAP Business Network for Logistics, you need to manually accept or reject it in the **Manage Invitations** app.

      If you set this option to **Yes**, all connection requests from inviters are automatically accepted.
6. When you're finished, click **Save** in the lower right-hand corner.

Frequently Asked Questions

Configure a Technical User (Optional)

A technical user is a token used for authentication and system connection. It is required only when you need to use the Write Service API provided by your solution owner on SAP Business Network for Logistics. You can create a technical user through the SAP ID service and maintain it in the **System Connections** app.

Context

ℹ Note

A technical user is only required when you need to use the Write Service API provided by the solution owner connected with you on the network. If you only want to use the APIs in the API Accelerator Hub (see APIs for SAP Business Network Global Track and Trace and APIs for SAP Business Network Freight Collaboration) or use the apps in the SAP Fiori Launchpad, skip this task.

A technical user is a role but not a person, nor a business user. It is a token used by selected services to access SAP Business Network for Logistics and authenticate system connection.

Procedure

Create a Technical User:

1. Go to the SAP ID service and create a user.

   Enter a unique email address that is not used by any of the users that you've created for SAP Business Network for Logistics.

   After registering the user, an email with the subject **Activate Your Account for SAP.com** will be sent to the email address.

2. Use the link in the email to activate the account.
3. On the **Personal Information** screen, note down the user ID, which starts with the letter P. You'll need it later.

Maintain the Technical User in the **System Connections** app:

4. Sign in to SAP Business Network for Logistics.
5. In the SAP Fiori Launchpad window, open the **System Connections** app.
6. Choose **Manage Alternate IDs**.
7. Add an alternate ID as follows:
   - **Type**: `Technical User`
   - **ID**: the email address of the technical user
8. Choose **Save**.

Accept Connection Request

Your company was invited to join SAP Business Network for Logistics by one of your business partners. You need to accept the inviting company's connection request before you can collaborate with it on the network. Additionally, if you need to use the Write Service API provided by the solution owner connected with you, you must send your technical user's email address to the solution owner.

Context

If you have set **Automatically accept connection requests (invitations)** to **Yes** in the previous task (see Create Your Company's Business Profile). The connection request has already been automatically accepted.

If your **Automatically accept connection requests (invitations)** is set to **No**, you can manually accept the request in the **Manage Invitations** app.

Procedure

1. Open the **Manage Invitations** app.

   The number "1" that's displayed on the app tile means you've received one new request.

2. In the **New** worklist, accept the invitation.
3. (Optional) If you need to use the Write Service API provided by the solution owner connected with you on the network, you also need to send the email address of your technical user (you've recorded it in a previous task: Configure a Technical User (Optional)) to the administrator of the solution owner that invited you. You can find the contact information in the invitation details. If you only want to use the APIs in the API Accelerator Hub or use the apps in the SAP Fiori Launchpad, skip this step.

Results

The request moves to the **Accepted** worklist.

After you accept the request, the inviter is notified.

Add Users

As an administrator, you can add users to your company's tenant on the network. The users you add will be able to sign in to the network with their own sign-in details and use the apps relevant to their roles.

Procedure

You can watch a short video *Create Users and Assign Roles* in Carrier Administrative Trainings to get step-by-step overview of the procedure.

1. Sign in to SAP Business Network for Logistics and open the **User Management** app.
2. Click **Add** on the right-hand side.
3. In the new entry, enter information about the user and assign user group(s) to the user. When you're finished, click **Save**.
    - Users assigned to the "...Admin" user group are administrators. They can perform administrative tasks using the following apps:
        - **Manage Business Profile**
        - **Retention Management**
        - **Blocking Store**
        - **Define User Settings**
        - **Manage Notification Settings**
        - **System Connections**
        - **Manage Invitations**
        - **User Management**
        - **Manage Integration Logs**
    - Users assigned to the "...All_Function" user group can access the following apps:
        - **Retention Management**
        - **Blocking Store**
        - **Define User Settings**
        - **Manage Notification Settings**
        - **Manage Invitations**
        - **Manage Disputes**
        - **Freight Orders for Confirmation**
        - **Freight Orders for Reporting**
        - **Review Freight Documents**
        - **Invoice Freight Documents**

- **Freight Quotations**
- **Freight Requests for Quotation**
- **Manage Invoices**
- **Self-Book Dock Appointments**
- **Manage Freight Execution**

4. Choose **Save**.

Results

After adding a user, the user receives an email with the subject "*Activate Your Account for User Profile*" from ias@notifications.sap.com. The email contains a link to activate the user account, which is required for logging onto the network.

ℹ Note

If the user already exists in SAP Business Network for Logistics, no activation email will be sent because the user was already activated for the network.

You need to send the network URL (see Sign In to SAP Business Network for Logistics) to the newly added users so they can sign in (after they've activated their user account).

ℹ Note

You can edit the user group assignment for a user in the **User Management** app by clicking the *Edit* icon for the user. The system will send an email to the user to notify the assignment change.

You can also delete a user by selecting a user and choosing **Delete** > **Delete User**. The deleted user can no longer access the apps in your company's tenant.

For more information, see the application help: User Management

Frequently Asked Questions

This section answers the questions that are frequently asked when you get started with SAP Business Network for Logistics, including questions with invitation emails, registering and getting an account, signing in, managing business profiles, and getting support.

Invitation Email

A business partner has invited me to join SAP Business Network for Logistics but I didn't receive the invitation email. Why?

The reason might be either of the following:

- Your mail server has blocked emails sent from saplbn@mailsap.com. Try searching for the email in your SPAM/Junk Mail box.
- If your company has already registered and activated your account on the network, new invitations are sent to your existing account in the network. In this case, you won't receive an invitation email for registration again. You only need to accept the new invitation, as described in Accept Connection Request.

If you have other questions concerning your company's existing tenant or administrator, please contact your dedicated SAP onboarding specialist.

Can SAP resend the invitation email to me?

Yes. Please contact your dedicated SAP onboarding specialist.

Registering and Getting Account

Why should I enter the PO number when placing the order in SAP Store?

The PO number is used by SAP to identify you as an invited business partner of the network. You must enter this number to ensure successful registration. You can find the PO number in the invitation email.

I encountered an issue when placing the order in SAP Store. What should I do?

If you have issues or questions with SAP Store, please contact SAP Store customer support by clicking **Need Help?** in SAP Store.

How do I know that my order in SAP Store has been successfully placed?

You'll receive emails from SAP store with the subject *SAP Store: Order request received* and *SAP Store: Your order is now fully processed*.

How do I know that my company has got an account for SAP Business Network for Logistics?

SAP starts preparing your account on the network after you place the order in SAP Store. When this is complete, you'll receive the following welcome emails:

- *Access information for SAP Business Network for Logistics*: this email contains the specific URL for your company to sign in to the network and the initial user account to sign in.
- *Activate Your Account for User Profile*: this email enables you to activate the initial user account and set the password.

I've registered SAP Business Network for Logistics in SAP Store but didn't receive the welcome emails. What should I do?

After the registration, you should receive several emails as listed in Welcome Emails. If you didn't receive them, proceed as follows:

1. The welcome emails are sent to the email box that you provided during the registration. If you are not the owner of that email box, contact the owner to get the emails.
2. Check your SPAM/Junk Mail box. It is possible that your email server identified some emails as SPAM/Junk Mails.
3. If the above do not work, please contact your dedicated SAP onboarding specialist.

What if my company needs more than one SAP Business Network for Logistics tenant?

When a company is invited to join SAP Business Network for Logistics, the PO number in the invitation email can be used to register one SAP Business Network for Logistics tenant only. If your company needs more than one tenant, please contact your dedicated SAP onboarding specialist.

Signing In

What is the URL for signing in to SAP Business Network for Logistics?

The sign-in URL is included in the access information email (email #4 described in Welcome Emails).

If you have added other users to your network (as described in Add Users), send the URL to them so that they can sign in with their own users/passwords.

What is the user name/password I should use to sign in to SAP Business Network for Logistics?

The initial user for the network is listed in the access information email. You need to activate the user and set a password, as described in Welcome Emails. Then you can use this initial user (email) and the password to sign in.

If you are not the initial user, your administrator can add you to the network. You'll receive an email with the subject "*Activate Your Account for User Profile*" from ias@notifications.sap.com. Click the activation link in the email to set a password. Then sign in with your email and password.

What if I don't know the URL for signing in to the network?

It is recommended that you keep the email that contains the sign-in URL (e.g. the email with the subject "*Access information for SAP Business Network for Logistics*") or create a bookmark for the URL in your web browser.

In case you can't find the email or remember the URL, perform the following steps to get the URL:

1. Go to: https://lbn.accounts.ondemand.com/ui/protected/userData
2. Sign on with your email and password. If you're asked to reset your password, just do it. If you don't remember the password, click **Forgot password?** and you'll receive an email for resetting it.

   After signing in, you'll see a page displaying your profile information.
3. Find your company's sign-in URL in the **User Custom Attribute 1** field. Remember to bookmark the URL for future use.

What if I forget my password for signing in to SAP Business Network for Logistics?

On the sign-in page, click **Forgot Password**. You'll receive the instructions for resetting your password.

How can I reset my password?

On the sign-in page, click **Forgot Password**. You'll receive the instructions for resetting your password.

Managing Business Profile

Why is it not possible to upload my company logo to my business profile?

When uploading your company logo in the **Manage Business Profile** app, verify if the logo meets size limitation: 2 MB

Getting Support

My company's admin user for SAP Business Network for Logistics has left. Can SAP add me as the new admin user?

Yes, we can add you as the admin user for your company. Please create an incident with component SBN-LBN-OB.

How to create an incident (report an issue) and get support?

If you encounter technical issues or require technical support, you may create an incident (report an issue) using the Get Support app, which is part of the Services & Support dashboard in SAP for Me. Sign in with your S-User ID. For detailed process, see Get Support Application Online Help.
