## Procedure

1. Open the **Freight Orders for Confirmation** app.
2. Within a worklist (**New**, **Responded To**, or **All**), select one or more freight orders. To reject a single freight order, you can also use the detail view.
3. Choose **Reject**.

## Next Steps

When you reject a freight order, it is first moved to the **Responded To** worklist. When the response time is over and the shipper sends a cancelation, it is displayed in the **All** worklist with status **Cancelation confirmed**.

# Confirming a Cancelation

If the ordering party cancels a freight order, you should confirm the cancelation to actively acknowledge the change.

## Context

To confirm a cancelation, proceed as follows:

## Procedure

1. Open the **Freight Orders for Confirmation** app.
2. Within the **New** worklist, select one or more canceled freight orders. To confirm a cancelation for a single freight order, you can also use the detail view.
3. Choose **Confirm**.

# Confirm Freight Bookings (Ocean)

The **Confirm Freight Bookings** app for ocean freight allows you to review and confirm ocean freight bookings that ordering parties ask you to execute.

The **Confirm Freight Bookings** app consists of a main view and a detail view. The main view has two screen areas:

- Filter bar

  Using the filter bar in the header, you can filter ocean freight bookings by one or more of the following fields:

  - **Freight Booking ID**
  - **Ordering Party**
  - **Departure Date**
  - **Departure Location**
  - **Arrival Date**
  - **Arrival Location**
  - **Port of Loading**
  - **Port of Discharge**

    - Vessel
    - Voyage
    - Dangerous Goods
        - Yes
        - No
    - Shipping Type
        - Less than Container Load
        - Full Container Load
        - Bulk
    - Contract Condition Code
        - Door to Door
        - Door to Port
        - Port to Door
        - Port to Port
        - Container Yard to Container Yard
        - Container Freight Station to Container Freight Station
        - Container Freight Station to Container Yard
        - Container Yard to Container Freight Station
    - Reference Document ID
    - Reference Document Type
    - Document Category
        - Freight Booking
        - Shipment

- Worklists

  You can view the following worklists: All, New, Confirmed, Rejected and Cancelled.

From the main view, you can navigate to the detail view, which has two screen areas:

- Header

  You can display data such as booking details, port details, and status.

- Sections

  You can display further details in the General Info, Cargo, Capacity, Locations, Date and Time, Stages, Contacts, Attachments, and Notes sections.

# Worklist (Confirm Freight Bookings (Ocean))

To restrict the number of ocean freight bookings displayed, you can use the preconfigured worklists (**All**, **New**, **Confirmed**, **Rejected**, and **Canceled**) according to the status of the freight booking.

## All

The **All** worklist displays all freight bookings that you have not yet responded to, responded to, and canceled. For each freight booking, the following information is displayed:

- Freight booking and booking party
- Confirmation status

  Displays one of the following confirmation statuses:

  - New
  - New (Updated)

    Displays this status when the ordering party sends an update on a freight booking that you have not yet confirmed.
  - Updated

    Displays this status when the ordering party sends an update on a freight booking that you have already confirmed.
  - Confirmed
  - Confirmed Automatically
  - Rejected
  - Cancelled
- Remaining time
- Departure date and time

  You can choose this field to sort the departure dates in ascending or descending order.
- Arrival date and time

  You can choose this field to sort the arrival dates in ascending or descending order.
- Departure location
- Arrival location
- Port of loading
- Port of discharge
- Stops

  When you choose the number of stops on the worklist, you can view the stop number and address for each stop.
- Capacity requested
- Shipping Type
- Contract condition code
- Reference documents

  When you choose the number of reference documents on the worklist, you can view the type and ID for each reference document.

- Document category

  Displays whether the document is a **Shipment** from SAP ECC or a **Freight Booking** from SAP Transportation Management (SAP TM) or TM on SAP S/4HANA system.

- Vessel
- Voyage

> **Note**
> When you choose stops, reference documents, departure location, arrival location, port of loading, and port of discharge, the system displays the additional details in a tile.

### New

The **New** worklist displays the freight bookings that you have not yet responded to or those that have been updated. The **New** worklist displays the same information as the **All** worklist.

You can select one or more freight bookings from the **New** worklist and choose **Confirm** or **Reject**.

### Confirmed

The **Confirmed** worklist displays all freight bookings that you've confirmed. The **Confirmed** worklist displays the same information as the **All** worklist.

### Rejected

The **Rejected** worklist displays all freight bookings that you've rejected. The **Rejected** worklist displays the same information as the **All** worklist.

### Canceled

The **Canceled** worklist displays all freight bookings that the shipper has canceled. The **Canceled** worklist displays the same information as the **All** worklist.

From the **All** tab and **New** tab, you can select a freight booking with the status as **New** and choose to either **Confirm** or **Reject** from the worklist page.

Note that you cannot confirm or reject freight bookings with the document category as **Shipment**.

You can choose to export the worklist into a spreadsheet by choosing the **Export to Spreadsheet** icon on the top right corner of the worklist table.

## Detail View (Confirm Freight Bookings (Ocean))

The detail view of a freight booking for confirmation consists of a header and several sections.

### Header

The **Header** section displays the following information:

- **Booking Details**

  Displays the **Document Category**, **Ordering Party**, **Consignee Party**, **Departure Location**, and **Arrival Location** information. Document category displays whether the document is a freight booking or a shipment. When you choose the ordering party, consignee party, departure location, or arrival location, you can view the phone number, email, and address details.

- **Port Details**

  Displays the **Port of Loading** and **Port of Discharge** information

- **Price**

  Displays the price limit set by the ordering party for the freight booking.

- **Submitted Price**

  Once you submit a price proposal and confirm the freight booking, you can view the price that you have submitted.

- **Remaining Time**

  The remaining time is not a mandatory field. Depending on the ordering party's setup, you may not be restricted by a dedicated response due date and time.

  Note that if it says **Confirm Automatically: Yes**, the network will automatically confirm the freight booking for you unless you reject it before the remaining time runs out.

- **Status**

  Displays one of the following confirmation statuses:

  - New
  - New (Updated)

    Displays this status when the ordering party sends an update on a freight booking that you have not yet confirmed.

  - Updated

    Displays this status when the ordering party sends an update on a freight booking that you have already confirmed.

  - Confirmed
  - Rejected
  - Cancelled

- **My Latest Response**

  Displays the latest action that you have taken on the freight booking. You can view one of the following:

  - Confirmed
  - Confirmed with Change
  - Rejected
  - Confirmed Automatically

## Information

The information section displays the following details:

- General

  Displays the following information:

  - Freight Booking
  - Master Bill of Lading
  - Means of Transport
  - Mode of Transport

    Note that based on the Mode of Transport specified here, you can view the freight booking either in this app or the Confirm Freight Bookings (Air) app. If the mode of transport is not specified or mapped appropriately in the Assign Codes app, then you can view the freight booking here in the Confirm Freight Bookings (Ocean) app.

- Cargo

  Displays the following information:

  - Dangerous Goods
  - Temperature Controlled
  - Cargo Weight
  - Cargo Volume
  - Cargo Quantity

- Voyage

  You can view the voyage, vessel, and IMO number of the first main carriage.

- Transportation

  Displays the following information:

  - Number of Visits
  - Number of Loading Stops
  - Number of Unloading Stops

- Locations

  Displays the following information:

  - Departure Location
  - Departure Date and Time
  - Arrival Location
  - Arrival Date and Time
  - Port of Loading
  - Port of Discharge

- Terms and conditions

  Displays the incoterm and incoterm location.

- Terms and Conditions

Displays the following information:

- Incoterm
- Incoterm Location

  Displays the incoterm location details. Note that you can view the incoterm location details that the ordering party has added in the Manage Locations app. If the ordering party has not added this information, you can view the text specified for incoterm location in the ordering party's external transportation system.

- Contract Condition Code

  Displays the contract condition code that the shipper has maintained in their SAP Business Network for Logistics system. Displays one of the following values:

  - Door to Door
  - Door to Port
  - Port to Door
  - Port to Port
  - Container Yard to Container Yard
  - Container Freight Station to Container Freight Station
  - Container Freight Station to Container Yard
  - Container Yard to Container Freight Station

**Note**

In the old freight bookings, the system still displays the abbreviations for this field.

- Administrative Data

  Displays the date and time you received the freight booking and the details of the last responded person and time.

- Reference Documents Section

  Displays the document type and document ID of the reference documents. You can add a reference document by choosing the add icon. Enter the document type and document ID of the reference document.

  You can also download the reference document details in a spreadsheet. You can view the following details in this document:

  - Document ID
  - Document Type Code
  - Document Type Description

## Cargo

The Cargo section displays the following data about the cargo items involved:

- Item ID

  Displays the cargo item ID.

  The system displays the cargo item ID as the combination of Delivery ID: Item ID in freight documents with the document category as Shipment.

- **Cargo Type**

  Displays whether the cargo item is a package, product, or a container.

- **Container Type**

  Displays the container type code.

- **Cargo Details**

  Displays the details of the cargo type, for example, 20 Foot Container.

- **Quantity**
- **Gross Weight**
- **Gross Volume**
- **Special Requirements**

  Displays one or more icons for the following special requirements:

  - **Dangerous Goods**
  - **Temperature Control**
  - **Stackable**
  - **Over Dimensional**
  - **Container Provisioning Requested**
  - **Shipper Owned**

  When you choose the special requirement icon for dangerous goods, you can perform the following:

  - View the dangerous goods information in a dialog box
  - Select the language in which you want to view the dangerous goods details
  - View the dangerous goods details for all the cargo items in this dialog box. When you navigate from a specific cargo item, you can view the dangerous goods of that cargo item.
  - Search the dangerous goods details for a specific cargo item using the search bar

When you select the details icon from a cargo item, the system displays the cargo information in a new page. The system displays the following information:

- **Header**
  - **Booking Details**

    On the header area, you can view the following booking information:

    - **Ordering Party**
    - **Departure Location**
    - **Arrival Location**
  - **Cargo Overview**

    On the header area, you can view the following cargo details:

    - **Cargo Type**

        - Container Type Code
        - Cargo Details
    - Special Requirements

      On the header area, you can view the following special requirements:

        - Dangerous Goods (Yes/No)
        - Temperature Control Required (Yes/No)
        - Stackable (Yes/No)
        - Over Dimensional (Yes/No)
        - Container Provisioning Requested (Yes/No)

          Displays whether the ordering party has requested for container provisioning.
        - Shipper Owned (Yes/No)

          Indicates whether the shipper owns the container.

- General Information

  This tab displays the following details:

    - Logistic Details
        - Container ID
        - Quantity
        - Gross Weight
        - Net Weight
        - Tare Weight
        - Length * Height * Width
        - Shipper Load Count
    - Verified Gross Mass
        - Weight
        - Weighing Method
        - Weighing Date and Time
        - Person Responsible
        - Weighing Partner
        - Weighing Location
    - Seal

      Displays the Seal Number and Sealing Party.

- Stages

  This tab displays the following information:

    - Stage

- Stage Type
- Transport Means Description
- Mode of Transport
- Source Location
- Source UN/LOCODE
- Destination Location
- Destination UN/LOCODE

- Activity
  - Cargo Type
  - Cargo Details
  - Activity
  - Location
  - Planned Start Date of Activity
  - Planned End Date of Activity
  - Planned Departure Date and Time
  - Planned Arrival Date and Time

### ℹ Note

- The ordering party can implement a business add-in (BAdI) to display only the main cargo items.
- Any notes sent by the ordering party with text type `LBNMI` will be discarded as it is a technical text type used to display main cargo items.

  You can view the aggregated dangerous goods information for the filtered items at the main cargo item level.

## Capacity

The Capacity section displays the following information for each container:

- **Container Type Code**

  Displays the code for the container type

- **Container Type**

  Displays the container type details

- **Container Count**

  Displays the number of containers requested per container type

- **Unit of Measurement**

  Displays the unit of measurement for the container count

- **Confirmed Container Count**
