Enter the number of confirmed containers per container type

- **Unit of Measurement**

  Displays the unit of measurement for the confirmed container count

- **Cargo Capacity**

  Displays the cargo capacity in TEU if maintained in the source system

- **Unit of Measurement**

  Displays the unit of measurement of the cargo capacity

Locations

For each stop, the system displays the following information:

- **Stop Number**
- **Location**
- **Planned Arrival Date and Time**
- **Planned Departure Date and Time**
- **Activities Overview**
- **Distance to Next Stop**
- **Time to Next Stop**

You can choose **View All Transportation Activities**, to view the following information:

- Header

  You can view the booking details, port details, and status.

- Stops

  You can view the details of each stop and the activities in each stop in a table format. The system displays the following information for each stop:

  - **Date and Time**

    Displays the planned arrival and planned departure date and time.

  - **Next Stop Details**

    Displays the distance to next stop and time to next stop.

  - **Activities**

    Displays the following information in a table format:

    - **Item ID**
    - **Activity**
    - **Cargo Details**
    - **Gross Weight**
    - **Gross Volume**

- Quantity
- Length x Width x Height
- Special Requirements

Date and Time

Displays the date and time details for each stop. Depending on the type of stop, the system displays the date and time information. The following are the different types of stops:

- Pick-Up Location

  Indicates the source location of the first pre-carriage stage.

- Delivery Location

  Indicates the destination location of the last on-carriage stage.

- Port of Loading

  Indicates the source location of the first main carriage stage.

- Port of Discharge

  Indicates the destination location of the last main carriage stage.

ℹ Note

- The port pick-up date, cargo cut-off date, and VGM cut-off date fields are not available in freight orders with the document category as Shipment.

The system displays these dates and times in the time zone of their respective stop location. Note that the system receives this time zone information for a location from the transportation management system. If there is no time zone associated with a location in the transportation management system, then the system receives this time zone information from the location master in the SAP Business Network for Logistics system. If there is no time zone associated with a location in the location master, then the system by default displays the time zone as UTC for that location.

Stages

Displays the following information:

- Stage Type

  Displays whether the stage is a pre-carriage, on-carriage, or main carriage stage.

- Transport

  Specifies the mode of transport and means of transport details. The mode of transport specifies one of the following values:

  - Maritime transport
  - Road transport
  - Air transport

  The mode of transport specifies one of the following values:

- Sea
- Road
- Air

- **Departure Location**

  If the ordering party has sent the departure location details, you can view the UN/LOCODE and the location of departure with the address and contact details. If not, you can enter the UN/LOCODE and update the freight booking.

- **Arrival Location**

  If the ordering party has sent the arrival location details, you can view the UN/LOCODE and the location of arrival with the address and contact details. If not, you can enter the UN/LOCODE and update the freight booking.

- **Date and Time**

  Displays the planned arrival and planned departure date and time.

- **Journey**

  Displays the following details:

  - **Voyage**

    Specify the voyage ID

  - **Vessel**

    Specify the vessel ID

  - **IMO Number**

    Specify the IMO ship identification number

  Note that the journey details are editable only in main carriage stages.

When you select the details icon from a stage, the system displays the stage details in a new page. You can view the following information:

- **Transport Details**

  Displays the means of transport and mode of transport details.

- **Location Details**

  Displays the departure and arrival location details.

- **Voyage Details**

  Displays the vessel and voyage details.

- **Expected Date and Time**

  Displays the expected arrival and departure date and time.

- **Cargo Items Table**

  Displays the following details of the associated cargo items in a table format:

  - **Item ID**
  - **Cargo Type**

- Container Type Code
- Cargo Details
- Quantity
- Gross Weight
- Gross Volume
- Special Requirements

  Displays one or more icons for the following special requirements:

  - Dangerous Goods
  - Temperature Control
  - Stackable
  - Over Dimensional
  - Container Provisioning Requested
  - Shipper Owned

Contacts

The Contacts section displays the following information for a contact in a card format:

- Contact Type
- Name
- Address
- Phone Number
- Email

You can view different icons in these tiles for the following:

- Various business partners such as shipper party, consignee party, forwarding agent, customs agent, and notify party
- Important locations such as, departure location, port of loading, port of discharge, and arrival location.

Attachments

In the Attachments tab, you can upload attachments that you want to send to the ordering party and view the attachments sent by the ordering party to you.

You can also toggle the view between the attachments that you have uploaded, the attachments from the ordering party, and the all the attachments.

Note that this section is not available in freight bookings with the document category as Shipment.

ℹ Note

- Attachment file type must be base 64

- You can attach documents related to the business document or business process in this section. You're recommended to avoid attaching sensitive personal data.
- You can only upload files that fulfil the following criteria:
    - Files must be of one of the formats: jpeg, gif, png, .pdf, .doc, .docx, .xls, .xlsx
    - Image files must be less than 6MB file size
    - Document files must be less than 5MB file size
    - When you mention the file path, you must mention the file name along with the extension.

Notes

The **Notes** section displays the notes the ordering party has sent you. You can as well enter your own notes.

ℹ Note

- Any notes sent by the ordering party with text type `LBNMI` will be discarded as it is a technical text type used to display main cargo items.
- You can enter notes when you reject a freight order. The ordering party can view these rejection notes in their transportation system.

Managing an Ocean Freight Booking

You can perform the following actions on a freight booking:

Confirming a Freight Booking

You can confirm a freight booking with the status as **New**. You can confirm a freight booking either from the worklist page or the freight booking details page. You can select one or more freight bookings from the **New** worklist and choose **Confirm**. You can also enter information in the editable fields in the freight booking details page and then confirm a freight booking. Note that once you confirm a freight booking, the status of the freight booking changes to **Confirmed**.

Confirming a Freight Booking with a Change

You can confirm a freight booking with a price proposal. For more information, see Confirming a Freight Booking with a Change.

Updating a Freight Booking

You can update a freight booking with the status as **Confirmed**. In the details page of a confirmed freight booking, you can update the information and choose **Update**.

In the **Stages** tab, you can now specify an **UN/LOCODE** for a location for which there is no location details or **UN/LOCODE** specified.

Rejecting a Freight Booking

You can reject a freight booking with the status as **New** or **Confirmed**. You can reject a new freight booking from the worklist page or the freight booking details page. You can select one or more freight bookings from the **New** worklist and choose **Reject**. You can also reject a confirmed booking from the freight booking details page.

ℹ Note

You cannot confirm, update, or reject freight bookings with the document category as **Shipment**.

Confirming a Freight Booking with a Change

Context

If the ordering party wants to receive proposals for alternative prices to those which they specified in the freight booking, then you can make a proposal by confirming the freight booking with a change. And, as long as the remaining time has not run out and the freight booking has not been closed by the ordering party, you can confirm a freight booking and make a price proposal for freight bookings that you previously rejected or confirmed.

ℹ Note

- The ordering party can maintain a setting in their transportation management system to either enable or disable you from modifying the price proposal currency. Based on this setting, for the direct tendering scenario, when you confirm a freight booking with change, the system either enables you to modify the price proposal currency or does not allow you to do so. You can view these details in the information icon next to the price proposal currency, in the dialog box, which appears when you choose the **Confirm with Change** button in the freight booking.
- You cannot view the **Confirm with Change** button if the ordering party has not maintained the necessary settings in their transportation management system.
- When you change the price proposal currency, the system automatically updates the settlement currency to be the same as the updated price proposal currency.

Procedure

1. Open the **Freight Bookings for Confirmation (Ocean)** app.
2. Within a worklist (**New**, **Confirmed**, **Rejected**, or **All**), look for the open freight booking for which you want to enter changes. Alternatively, you can also open the detail view of the freight booking.
3. Choose **Confirm with Change**.
4. Enter your price proposal and select a currency.
5. Choose **Confirm**.

Confirm Freight Bookings (Air)

The **Confirm Freight Bookings** app for air freight allows you to review and confirm air freight bookings that ordering parties ask you to execute.

The **Confirm Freight Bookings** app consists of a main view and a detail view. The main view has two screen areas:

- Filter bar

  Using the filter bar in the header, you can filter air freight bookings by one or more of the following fields:

    - Freight Booking ID
    - Ordering Party
    - Departure Date
    - Departure Location
    - Arrival Date
    - Arrival Location
    - Airport of Departure
    - Airport of Destination
    - Flight Code
    - Dangerous Goods
        - Yes
        - No
    - Contract Basis
        - Allotment
        - Blocked Space
        - Charter
        - Spot Quote
    - Contract Condition Code
        - Door to Door
        - Door to Port
        - Port to Door
        - Port to Port

- Worklists

  You can view the following worklists: All, New, Confirmed, Rejected and Cancelled.

From the main view, you can navigate to the detail view, which has two screen areas:

- Header

  You can display data such as booking details, port details, and status.

- Sections

  You can display further details in the Information, Cargo, Capacity, Locations, Date and Time, Stages, Contacts, Attachments, and Notes sections.

Worklist (Confirm Freight Bookings (Air))

To restrict the number of air freight bookings displayed, you can use the preconfigured worklists (All, New, Confirmed, Rejected, and Canceled) according to the status of the freight booking.

All

The **All** worklist displays all freight bookings that you have not yet responded to, responded to, and canceled. For each freight booking, the following information is displayed:

- Freight booking ID
- Ordering party
- Capacity requested
- Departure date and time

  You can choose this field to sort the departure dates in ascending or descending order.
- Arrival date and time

  You can choose this field to sort the arrival dates in ascending or descending order.
- Departure location
- Arrival location
- Airport of departure
- Airport of arrival
- Stops

  When you choose the number of stops on the worklist, you can view the stop number and address for each stop.
- Confirmation status

  Displays one of the following confirmation statuses:

  - New
  - New (Updated)

    Displays this status when the ordering party sends an update on a freight booking that you have not yet confirmed.
  - Updated

    Displays this status when the ordering party sends an update on a freight booking that you have already confirmed.
  - Confirmed
  - Rejected
  - Cancelled
- Shipping Type
- Contract condition code
- Reference documents

  When you choose the number of reference documents on the worklist, you can view the type and ID for each reference document.
- Flight code
- Contract basis

You can select a freight booking with the status as **New** from the **All** worklist and choose **Confirm** or **Reject**.

New

The **New** worklist displays the freight bookings that you have not yet responded to or those that have been updated. The **New** worklist displays the same information as the **All** worklist.

You can select one or more freight bookings from the **New** worklist and choose **Confirm** or **Reject**.

Confirmed

The **Confirmed** worklist displays all freight bookings that you've confirmed. The **Confirmed** worklist displays the same information as the **All** worklist.

Rejected

The **Rejected** worklist displays all freight bookings that you've rejected. The **Rejected** worklist displays the same information as the **All** worklist.

Canceled

The **Canceled** worklist displays all freight bookings that the shipper has canceled. The **Canceled** worklist displays the same information as the **All** worklist.

You can choose to export the worklist into a spreadsheet by choosing the **Export to Spreadsheet** icon on the top right corner of the worklist table.

Detail View (Confirm Freight Bookings (Air))

The detail view of a freight booking for confirmation consists of a header and several sections.

Header

The **Header** section displays the following information:

- **Booking Details**

  Displays the **Document Category**, **Ordering Party**, **Consignee Party**, **Departure Location**, and **Arrival Location** information. Document category displays whether the document is a freight booking or a shipment. When you choose the ordering party, consignee party, departure location, or arrival location, you can view the address, and address details.

- **Airport Details**

  Displays the **Airport of Departure** and **Airport of Destination** information. When you choose the airport of departure or destination, you can view the address and contact details.

- **Status**

  Displays one of the following confirmation statuses:

  - New
  - New (Updated)

    Displays this status when the ordering party sends an update on a freight booking that you have not yet confirmed.
  - Updated

Displays this status when the ordering party sends an update on a freight booking that you have already confirmed.

- Confirmed
- Rejected
- Cancelled

- Displays whether the freight booking is in **New**, **Confirmed**, **Rejected**, or **Cancelled** status.

Information

The information section displays the following details:

- **General**

  Displays the following information:

  - **Freight Booking**
  - **Master Airway Bill**
  - **House Airway Bill**
  - **Contract Basis**

    Displays one of the following values:

    - Allotment
    - Blocked space
    - Charter
    - Spot quote
  - **Shipping Type**

    Note that as of now, you can only view bookings with the shipping type as loose cargo.

- **Cargo**

  Displays the following information:

  - **Requested Cargo Weight**
  - **Requested Cargo Volume**
  - **Requested Cargo Quantity**
  - **Dangerous Goods**
  - **Cargo Quantity**
  - **Temperature Controlled**

- **Journey**

  You can view the flight code details.

- **Transportation**

  Displays the following information:

  - **Number of Visits**
