EDIFACT IFTMBC – Freight Order Confirmation

EDIFACT IFTMBC

UNB same as sender/receiver Ids reversed

- BGM segment for FO# and confirmation stats (AP for approve, RE for reject)
- RFF+ABO:<Sender System Id>
- Optional note with FTX segment
- SAP IFTMBC Spec
- Generally very easy to implement – just remember the sender system Id!

Note: no fields for driver details or truck Id / license plate. Can cause issues with P44 or other visibility provider tracking

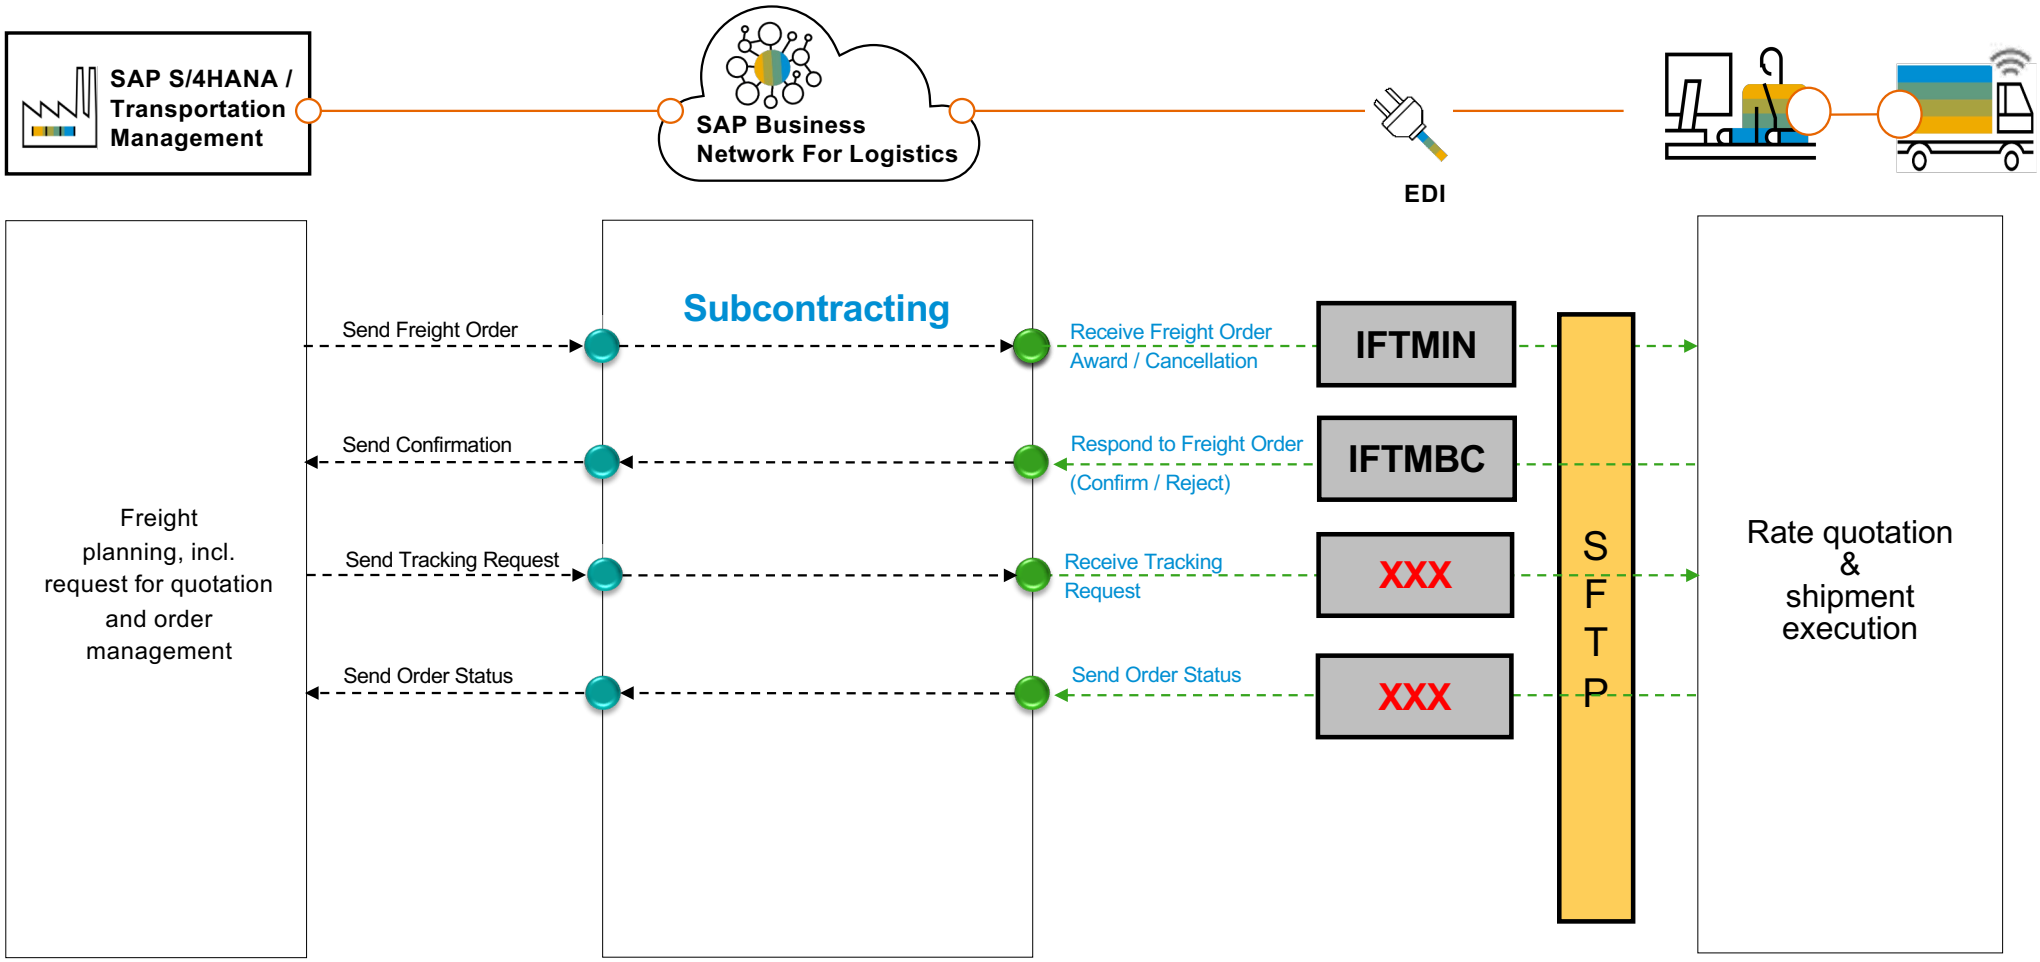

```

Demo & Exercise

EDIFACT IFTMBC

INTERNAL – SAP and Partners Only

EDIFACT Orders Status – Not Support for GTT

Note: EDIFACT IFTSTA (Order Status) is supported for FC Tracking

INTERNAL – SAP and Partners Only

EDIFACT IFTSTA – Order Status (FC Tracking Only)

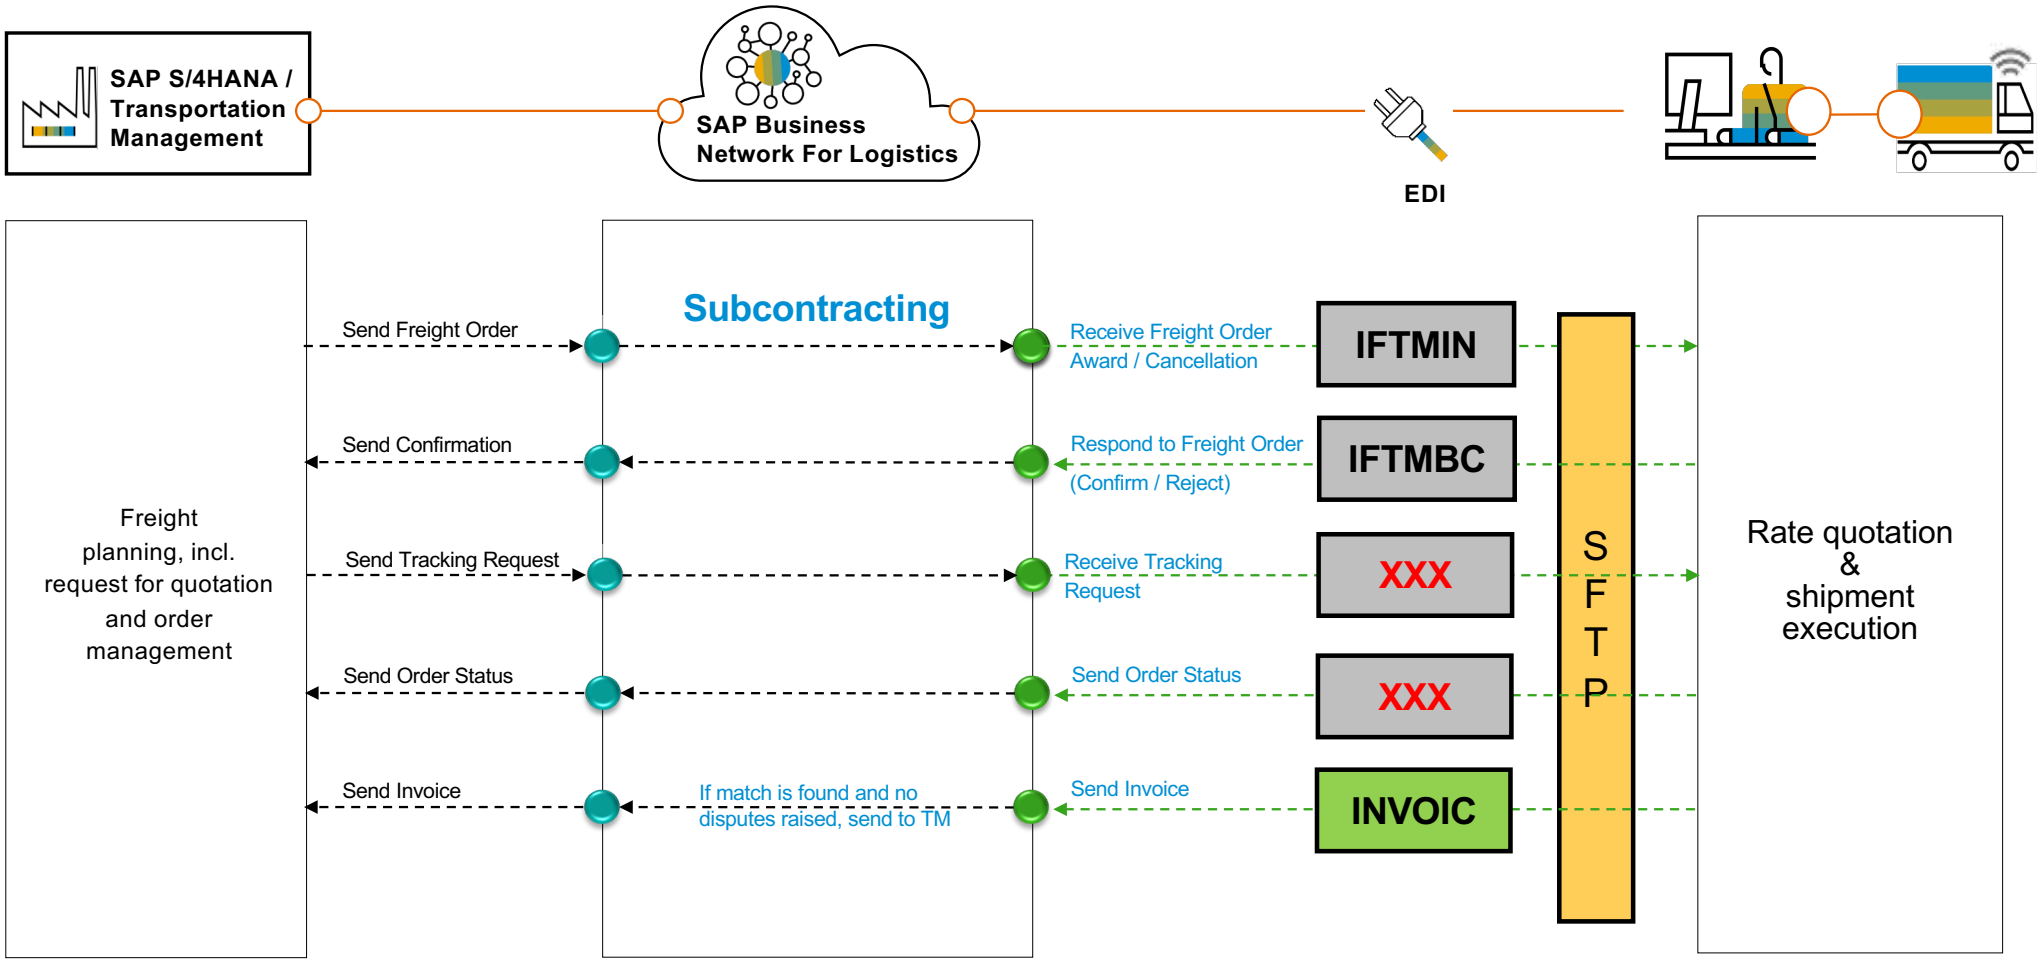

Only works with FC Tracking – GTT does not yet support

- STS segment for event type
- RFF+ZZ1 for Sender System Id
- RFF+ZZ7 and RFF+ZZ28 are stop Ids

```

EDIFACT INVOIC – Invoice

EDIFACT INVOIC – Invoice

Submit an Invoice for 1 or more Freight Orders

- Important segments
  - RFF+ZZ1: Sender System Id
  - RFF+ZZ2: Freight Order #
  - NAD+II: carrier business partner Id in TM
  - NAD+IV: shipper business partner Id in TM
  - **Note:** Shipper must tell carrier what the business partner Ids are since they aren't sent in IFTMIN
- Can send Flat Charges, Percentage Charges, Rate Based Charges (Ex: Per Mile)
- SAP INVOIC Spec

```
