ANSI EDI 990

ISA / GS same as 204 but IDs reversed

- N9*06 segment for system sender Id
- B1 segment for SCAC*FO#*Date*Acceptance code (A for accept and D for decline)
- SAP 990 Spec
- Generally, very easy to implement – just remember the sender system Id!

Note: no fields for driver details or truck Id / license plate. Can cause issues with P44 or other visibility provider tracking

Customer Success Story – Large Frozen Food Manufacturer and Distributer

Integrated 80+ Carriers on the Network for Road

- Both EDI and API integrations
- Worked closely with SI who project managed the carrier integration project
- Full Freight Order life cycle was integrated

- Lessons learned – Invoicing is hard! Test, test and test some more!

Demo & Exercise

ANSI X12 990

INTERNAL – SAP and Partners Only

ANSI X12 EDI 990 – Freight Order Confirmation

ANSI EDI 213 – Tracking Request

Only supported for shippers with GTT

- Not supported by carriers often
- RFF*06 and RFF*8X segments needed for 214
- REF*LU or REF*QN needed for 214
  - LU is location Id
  - QN is stop Id
- SAP 213 Spec

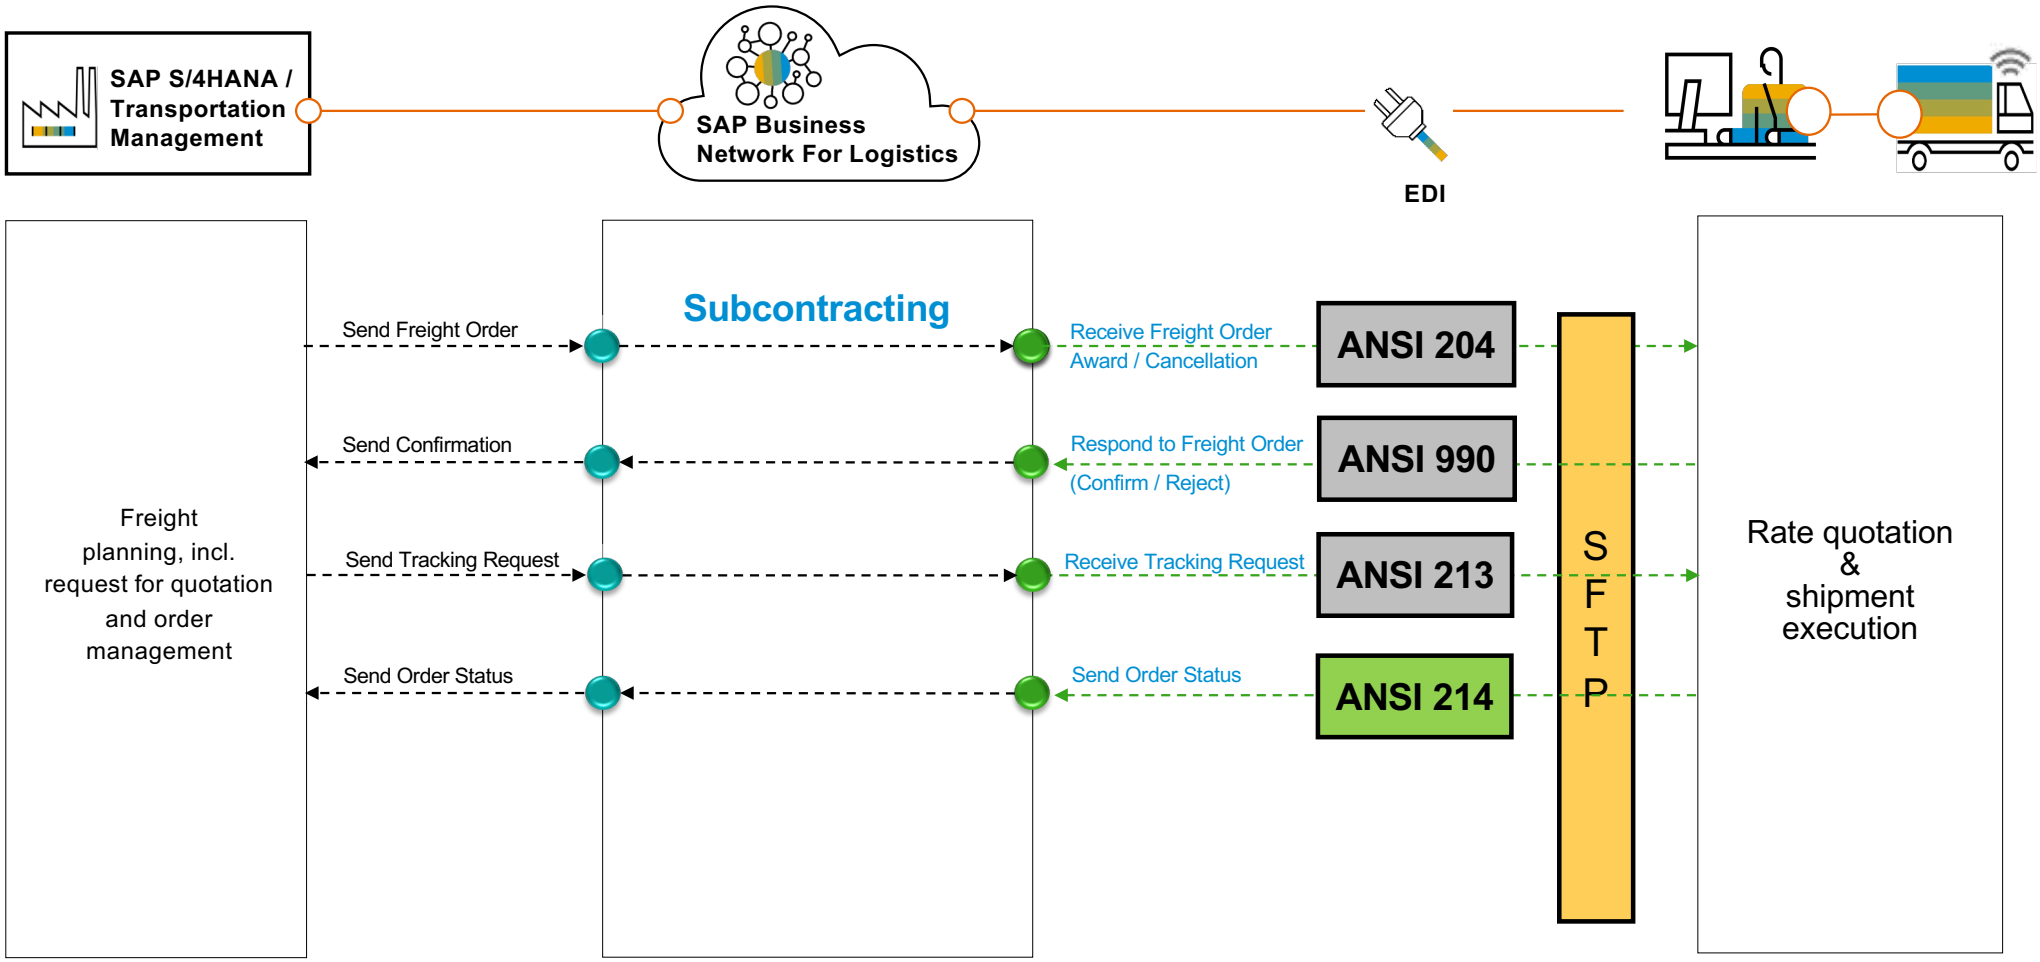

```

ANSI X12 213

INTERNAL – SAP and Partners Only

ANSI X12 EDI 214 – Order Status

ANSI EDI 214 – Order Status

Only supported for shippers with GTT

- L11 segments very important!
  - L11/06: Sender System Id
  - L11/8X Tracking Document
  - L11*GTT*T7 – Signifies this for GTT
  - These 3 often hard coded since carrier doesn't get 213
- Must return Stop Id (L11/QN) or (L11/LU)
- AT7 segment for order status type
- [SAP 214 GTT Spec]

Order Status Codes

The following status codes are supported

EDI Status Code	EDI Status Code Description
X3	Arrived at pick-up location
AF	Carrier departed pickup location with shipment
AG	Estimated delivery
X6	En-Route to delivery location
D1	Completed unloading at delivery location
CP	Completed Loading at Pick-up Location
X1	Arrived at delivery location
SD	Shipment Delayed

INTERNAL – SAP and Partners Only

Shipment Delayed – Reasons Supported

The following status codes are supported

EDI Reason Code	BN4L Reason Code	Reason Description
BE	LBN_TRAFFIC	Traffic
AI	LBN_BRKDWN	Breakdown
C1, C6, C7, P2	LBN_WTGLOC	Waiting at Location
B8	CLEANLINESS_NOT_FIT	Cleanliness not fit
BC	DOCUMENTMISSING	Documents Missing / IT Failure
AF	ACCIDENT	Accident
AO	FORCEOFNATURE	Force of Nature, Weather, etc.
A2	INCORRECT	Incorrect or Not Conform
AQ, C9, D2, T3, T5, T6	NOTAVAILABLE	Not Available
AK	PACKAGINDAMAGED	Package Damaged
C5	STRIKE	Strike
All Others	LBN_OTHERS	Others

INTERNAL – SAP and Partners Only
