The In Error worklist displays all invoices that have not appeared in the SAP Transportation Management system because they contain errors and need to be rectified. This worklist displays the same information as the All worklist.

Ready for Submission

Tax cannot be edited in a document that is disputed between a shipper and a carrier. Therefore, the Ready for Submission worklist displays all disputed documents that have been resolved and now need to be reviewed by the carrier and any relevant tax lines edited before the invoice is submitted to the SAP Transportation Management system.

> **Note**
>
> Invoices whose disputes have been resolved will appear in the Ready for Submission worklist irrespective of whether the carrier has subscribed to receive emails or not. However, the carrier will receive an email notification only if he or she has subscribed to receive emails for the scenario Invoice Submission After Dispute Resolution in the Manage Notification Settings app.

This worklist displays the same information as the All worklist.

Choosing an individual invoice takes you to an overview of the Invoice Details, Charges, Business Partners, Notes, and Attachments. Note that you can edit only tax lines (on the Charges worklist) and notes in this invoice.

You can choose Save to save your changes without submitting the invoice. Once you are satisfied that the invoice details are correct, choose Submit to submit the invoice to the SAP Transportation Management system. You can also choose Cancel to exit the current screen without saving any changes you may have entered.

Cancelled with Credit Memo

The Cancelled with Credit Memo worklist displays all invoices that are cancelled with credit memo. This worklist displays the same information as the All worklist.

Rejected by Ordering Party

The Rejected by Ordering Party worklist displays all invoices that are rejected by the ordering party in their external system. This worklist displays the same information as the All worklist.

Detail View (Manage Invoices)

The detail view of an invoice consists of a header and several sections.

Header

You can view the following important information about the invoice:

- General details

  Displays the ordering party details, payment terms you agreed with your ordering party for goods or services provided, and purchasing group details.

- Gross invoice amount

  Displays the total gross invoice amount of the invoice. That is, if you have a collective invoice, the gross invoice amount is the total of gross amounts from all the included freight documents. Note that the gross amount is the sum of net amount

and tax amount.

- Status

  Displays one of the following invoice statuses:

  - **Draft**

    This status appears when you create a new invoice and the invoice is not yet submitted to the ordering party.

  - **Submitted**

    This status appears when you submit the invoice to the ordering party.

    Note that when the invoice is submitted to the ordering party and an invoice has been created in the ordering party's external system, you can view an information button next to the **Submitted** status. When you choose this button, you can view the message **Created in ordering party's system**.

  - **In Dispute**

    This status appears when there is a dispute for an invoice document as a result of differences and potential disputes between what the ordering party expects to pay against what you expect to be paid.

  - **In Error**

    This status appears when you reopen an invoice that does not appear in the SAP Transportation Management system due to errors which need to be rectified.

  - **API Invoice Error**

    This status appears when there is any error in the Provider API for Invoicing.

  - **Ready for Submission**

    Tax cannot be edited in a document that is disputed between a shipper and a carrier. Therefore, this status appears on an invoice when the relevant disputed document has been resolved and now needs to be reviewed by the carrier and any relevant tax lines can be edited before the invoice is submitted to the SAP Transportation Management system.

  - **Pending Submission**

    This status appears when the freight order is not yet sent by the ordering party and consecutively the order is not yet received in the Business Network for Logistics system. Note that this status relevant only for invoices created using the **Provider API for Invoicing**.

  - **Rejected by Dispute**

    This status appears when the invoice is rejected due to the rejection of dispute. Note that this status relevant only for invoices created using the **Provider API for Invoicing**.

  - **Cancelled with Credit Memo**

    This status appears when the invoice is cancelled with credit memo.

  - **Rejected by Ordering Party**

    This status appears when the invoice is rejected and the dispute is cancelled by the ordering party in their external system.

  - **Processed by Ordering Party**

    This status appears when the ordering party has processed the invoice in their external system.

- Cancel with credit memo button

You can cancel an invoice with credit memo using the **Cancel with Credit Memo** button. Note that you can view this button only in invoices with the following statuses:

- **Submitted**
- **In Dispute**
- **Ready for Submission**

When you cancel an invoice with credit memo, you can verify and edit the credit memo ID in the dialog box that appears. The system cancels the invoice in the **Manage Invoices** app and updates the status as **Cancelled with Credit Memo**, and submits a credit memo to the ordering party's external transportation system.

- **Rejected by Ordering Party**

  This status appears when the invoice is rejected and the dispute is cancelled by the ordering party in their external system.

Invoice Details

The **Invoice Details** section displays general details and invoice item details.

Note that the ordering party can choose to enable or disable mandatory addition of attachments. You can view a message indicating the same if uploading attachments is mandatory.

In the general details section, you can view and edit the invoice ID and invoice date.

Reference Documents Section

Displays the document type and document ID of the reference documents which were sent by the ordering party in the freight order. Additionally, you can add a reference documents by choosing the add icon. Enter the document type and document ID of the reference document.

You can also download the reference document details in a spreadsheet. You can view the following details in this document:

- **Document ID**
- **Document Type Code**
- **Document Type Description**
- **Created On (UTC)**
- **Created By**

Freight Documents

In the invoice item details section, you can view the freight documents included in the invoice. The system displays the following information:

- Freight document

  Displays the freight document IDs of the included freight documents. You can navigate directly to the displayed freight documents from this section.

- Freight document details
- Arrival and departure locations
- Gross amount

Displays the freight document amount. Gross amount is the sum of net amount and tax amount.

- Tax amount

  Displays the total tax amount of the freight document.

- Net amount

  Displays the freight document amount excluding the tax amount.

Charges

The **Charges** section displays the following information:

- Charge description

  Displays the charge type details for each stage in each freight document. Charge types are the classification of charges for which you charge the ordering party.

- Charge type (Transportation System)

  Classification of charge line that indicates the type of charges such base rate, surcharge, or discount, as specified in the ordering party's SAP Transportation Management system.

- Rate amount/unit

  Displays the flat rate amount or rate amount per unit, for example, USD 20 per 1 kg.

- Quantity

  Displays the total quantity relevant for calculating the final amount.

- Final amount

  Displays the final amount that has been derived from the rate amount, quantity, and calculation method.

  Note that the system does not automatically perform charge calculation. If you manually change the rate amount, you must also change the final amount and vice versa.

You can add a new charge line in the charges table by choosing **Add** > **Charge**. You can add a tax line in the charges table by choosing **Add** > **Tax**. You can also delete an existing charge line from the charges table.

Note that when you add a tax line, you can use the tax codes and percentage values maintained by the ordering party.

When you select a charge line, you can view the following additional details specific for the selected charge:

- Transportation charges

  You can view the charge details such as line number, charge type, calculation methods, and payment terms.

  - Line number
  - Charge description

    Displays the classification of charges for which you charge the ordering party. These are the transportation mode-specific codes that are predefined by SAP Business Network for Logistics.

  - Calculation method

    Displays the logic with which the system calculates the charges.

  - Payment terms

Displays the conditions of payment you agreed with your ordering party with respect to goods supplied or services provided.

- Logistical reference

  Displays the item or stage information for a charge line (for container, package, product, or stage) from which the system obtains the logistical data.

- Calculation basis

  Displays the actual base or factor with which the system calculated the charges. You can view the calculation basis for rates belonging to a rate table.

- Exchange rates

  Displays the exchange rate information that is used as the basis for currency conversion.

For rates belonging to a rate table, you can view the calculation basis for the rate. You can also modify the calculation basis in the dialog box that appears.

Business Partners

You can view the various business partners associated with the invoice. The system displays the role of the business partner whether the business partner is a carrier, ordering party, bill-to party or bill-from party. The system also displays the address of the business partner.

Notes

You can enter information about the invoice in this section. The ordering party can view the information you enter in this section.

ℹ Note

Notes are intended to provide additional information related to the business document or business process. We recommended you to avoid entering sensitive personal data.

Attachments

You can add attachments in this section. The ordering party can view documents you attach in this section. You can also upload attachments relevant to the additional charges you may incur. The ordering party can view these attachments in their **Manage Disputes** app.

Note that the ordering party can choose to enable or disable mandatory addition of attachments. You must add an attachment before submitting the invoice if the addition of attachments is set as mandatory by the ordering party. You can also view a message indicating the same.

ℹ Note

You can attach documents related to the business document or business process in this section. You're recommended to avoid attaching sensitive personal data.

You can upload attachments for invoices with the status as **In Error** when you resubmit an invoice.

You can only upload files that fulfil the following criteria:

- Files must be of one of the formats: jpg, gif, png, .pdf, .doc, .docx, .xls, .xlsx

- Image files must be less than 6MB file size
- Document files must be less than 5MB file size
- File name must be less than 150 characters including file extension

Message Log

The system now displays the **Message Log** tab for invoices with the invoice status as **API Invoice Error**. You can view all the messages in this tab.

Editing and Submitting Invoices

You can view all the freight documents from one or more of your ordering parties using the **Invoice Freight Documents** app. You can select one or more of these freight documents and create a single invoice or a collective invoice for your ordering party for the services that you provided. For more information about invoice creation process, see Creating Invoices from Freight Documents.

For more information about collective invoice creation process, see Creating a Collective Invoice.

When you create one or more invoices from one or more freight documents, the system uses the data from the freight document and fills it in the corresponding fields in the invoice. The system assigns **Draft** status to the newly created invoice.

Editing an Invoice

Before you submit an invoice to the ordering party, you can edit an invoice directly in the app or you can download a Microsoft Excel file of the invoice, edit the downloaded file, and then upload the edited file back in the app. Using either method, the system allows you to perform the following:

- Edit the invoice ID and invoice date
- Edit rate amount and final amount
- Add a tax charge line and specify the following:
    - Tax type (maximum of 3 characters)
    - Percentage
    - Final amount

      Note that for only for tax charge lines, you can specify the final amount as zero.

    ℹ Note

    The system does not calculate the final amount automatically. You must manually calculate and enter the final amount with the percentage that you specify.

    As SAP Business Network for Logistics does not maintain any default tax codes, you must agree with the ordering party on the relevant tax codes and percentages and maintain those values here.

- Edit numeric logistical data for a charge
- Add new charges in the charges table if you have any unplanned charges
- Exclude an existing charge

Editing in the App

1. In the Fiori launchpad, choose the **Manage Invoices** tile.
2. Search for the invoice that you want to edit using the invoice ID and open the invoice.
3. In the **Invoice Details** section, you can edit the invoice ID and invoice date.
4. Navigate to the **Charges** tab and you can perform one or more of the following:
    - Add new charges.
    - Exclude an existing charge.
    - Edit the numeric logistical data for a rate inside the pop up.
    - Edit the rate and the final amount.

      Note that the system does not recalculate the final amount when the rate is changed. You must manually change the final amount when you change the rate amount and vice versa.
5. Save your changes.

Editing Charges using Microsoft Excel

You can also download the invoice in Microsoft Excel file format, make changes to the downloaded file and then upload it back to the app.

1. You download the invoice as Microsoft Excel file by choosing **Download/Upload Invoice** > **Download Invoice**.

   The system downloads the file in xlsx format with all the information of the invoice.
2. Edit the data in the editable fields.
3. Save your changes.

   In the **Manage Invoices** app, navigate to the appropriate invoice and choose **Download/Upload Invoice** > **Upload Invoice**.
4. Choose the updated invoice for upload.

   Note that the edited invoice file must be in xlsx format.
5. Once you upload the invoice, the system performs a validation.

   If there are no validation errors, the invoice is uploaded. You can attach relevant documents for the new and existing charges. If there are validation errors, the system displays them in an error log which you can download.

ℹ Note

Please ensure that you do not enter any personal data in the Microsoft Excel file.

For more information about the invoice upload process, see SAP Library for the freight collaboration option for SAP Business Network for Logistics on SAP Help Portal at https://help.sap.com. In SAP Library, choose **Invoice Upload Guide**.

Once you are done editing the invoice, you submit the invoice. Note that you can also choose to save the invoice and submit later. The system also changes the status of the invoice to **Submitted**.

When you submit an invoice to the SAP Transportation Management system, the system checks the invoice against the data contained in the freight document. If it detects inconsistencies between the invoice and the freight document, the system

automatically creates a dispute and informs the ordering party accordingly. The ordering party can then either accept the invoice or engage in dialog with you until the dispute has been resolved.

Resubmitting Invoices

You can reopen a submitted invoice to make any necessary changes and then resubmit the invoice.

Context

If an invoice for a freight document contains certain errors such as, an incorrect tax charge type, the invoice might not appear in the SAP Transportation Management system when you submit it. In this case, the customer can inform the carrier that the invoice has not been created in SAP Transportation Management and then ask the carrier to reopen the invoice, make the necessary changes and resubmit the invoice.

ℹ Note

You only need to reopen an invoice if the invoice has failed in SAP Transportation Management. Otherwise, you should not reopen invoices that have already been submitted. If you reopen an invoice that was created in the SAP Transportation Management system without any errors and then try to resubmit it, the system rejects the invoice as the invoice ID is identified as a duplicate. This ensures that the process is not interrupted.

Procedure

1. Go to the **Submitted** worklist tab to reopen an invoice that has already been submitted.
2. Choose the **Reopen** button. The system then changes the invoice status to **Error** to indicate that the invoice is in progress again and the invoice appears on the **Error** worklist tab.

   ### ℹ Note

   The invoice ID is read-only, but you can modify the **Charge** fields, and **Notes** and **Attachments** can also be edited.

   The **Reopen** button appears only on invoices that have been submitted, but have not yet reached the ordering party's external system.

3. Make the necessary changes, such as excluding all **0** amounts or adding tax codes, and choose **Save** to save the invoice. The invoice status remains as **Error**.
4. Choose **Submit** to resubmit the invoice. The invoice status then changes to **Submitted**.

Results

Once the invoice has been corrected and resubmitted, it is created in the SAP Transportation Management system.

ℹ Note

When you reopen an invoice, the status of the invoice is set as **In Error**. After this if the invoice is created in the ordering party's external system, you can view the following message:

As the invoice is already created in shipper's system, you cannot reopen and submit the invoice. Please choose Update to update the current status.

You can choose **Update** to update the status as **Submitted**.

If you still want to make changes to the invoice, you can cancel this invoice and create a new one.

Credit Memos

You can use the **Credit Memos** app to view all the credit memos that you created during the freight settlement process in the freight collaboration option for SAP Business Network for Logistics.

You can cancel an invoice with credit memo in the **Manage Invoices** app. When you do so, the system updates the invoice status as **Cancelled with Credit Memo** and creates a credit memo document in SAP Business Network for Logistics. For more information, see Manage Invoices.

When you launch the app, the system displays the main view with the following areas:

- Filter bar

  Using the filter bar in the header, you can filter the credit memos based on one or more of the following attributes to restrict the number of credit memos displayed:

  - Credit memo
  - Invoice
  - Freight document
  - Customer account
  - Ordering party
  - Created on
  - Purchasing group

From the main view, you can navigate to the detailed view of a credit memo. The detailed view has the following areas:

- **Header**

  You can view the following information:

  - **General Details**

    Displays the invoice ID, ordering party, customer account, and purchasing group.

  - **Gross Credit Amount**

- Sections

  You can view further details of the freight document in the following sections:

  - **Credit Memo Details**
  - **Charges**
  - **Business Partners**

Detail View (Credit Memos)

The detail view of a credit memo consists of a header and several sections.

Header

You can view the following important information about the invoice:

- General details

  Displays the invoice, ordering party, customer account and purchasing group details. You can navigate directly to the displayed invoice document from this section.

- Gross credit amount

  Displays the total gross credit amount of the credit memo.

Credit Memo Details

The **Credit Memo Details** section displays general details and item details.

In the general details section, you can view the credit memo ID, created on, and the payment terms you agreed with your ordering party with respect to goods supplied or services provided.

In the invoice item details section, you can view the freight documents associated with the credit memo. The system displays the following information:

- Freight document

  Displays the freight document IDs of the included freight documents. You can navigate directly to the displayed freight documents from this section.

- Freight document details
- Arrival and departure locations
- Gross credit amount
- Tax amount
- Net amount

Charges

The **Charges** section displays the following information:

- Charge description

  Displays the charge type details for each stage in each freight document. Charge types are the classification of charges for which you charge the ordering party.

- Charge type (Transportation System)

  Classification of charge line that indicates the type of charges such base rate, surcharge, or discount, as specified in the ordering party's SAP Transportation Management system.

- Rate amount/unit

  Displays the flat rate amount or rate amount per unit, for example, USD 20 per 1 kg.

- Quantity

  Displays the total quantity relevant for calculating the final amount.

- Final amount

  Displays the final amount that has been derived from the rate amount, quantity, and calculation method.
