When you select a charge line, you can view the following additional details specific for the selected charge:

- Transportation charges

  You can view the charge details such as line number, charge type, calculation methods, and payment terms.

  - Line number
  - Charge description

    Displays the classification of charges for which you charge the ordering party. These are the transportation mode-specific codes that are predefined by SAP Business Network for Logistics.
  - Calculation method

    Displays the logic with which the system calculates the charges.
  - Payment terms

    Displays the conditions of payment you agreed with your ordering party with respect to goods supplied or services provided.
  - Logistical reference

    Displays the item or stage information for a charge line (for container, package, product, or stage) from which the system obtains the logistical data.
- Calculation basis

  Displays the actual base or factor with which the system calculated the charges. You can view the calculation basis for rates belonging to a rate table.
- Exchange rates

  Displays the exchange rate information that is used as the basis for currency conversion.

Business Partners

You can view the various business partners associated with the credit memo. The system displays the role of the business partner whether the business partner is a carrier, ordering party, bill-to party or bill-from party. The system also displays the phone number, email, and address of the business partner.

Manage Disputes

As a carrier, you can have a self-billing process in place with the ordering party, wherein you do not submit an invoice for the transportation services. Instead, the ordering party settles automatically based on the information in the freight document.

In this process, you can have differences and potential disputes between what the ordering party expects to pay against what you expect to be paid. To keep good business relationships, you need to work closely with the ordering party to resolve these differences in a collaborative way. You need to get clarification on the differences and converge on an understanding with the ordering party on how to resolve the differences.

You can create disputes against the freight documents for self-billing for additional unplanned charges, rates, quantities, and final amounts. To create a dispute case, you can use the **Review Freight Documents** app. Once the system creates a dispute, you can view this document in the **Manage Disputes** app.

The **Manage Disputes** app consists of a main view and a detail view.

When you launch the app, the system displays the main view with the following areas:

- Filter bar

  Using the filter bar in the header, you can filter the disputes based on one of the following attributes, to restrict the number of disputes displayed:

  - Dispute
  - Ordering party
  - Created on
  - Customer account
  - Arrival location
  - Arrival location ID
  - Changed by
  - Changed on
  - Consistency status
  - Created by
  - Departure location
  - Departure location ID
  - Freight document
  - Gross amount
  - Gross amount currency
  - Open disputes
  - Parent document type
  - Parent gross amount
  - Partner gross amount
  - Purchasing group
  - Resolved disputes

- Worklists

  You can use the following worklists: **New**, **To be Approved**, **Submitted**, **Resolved**, and **All**.

From the main view, you can navigate to the detailed view of a dispute. The detailed view has the following areas:

- Header

  You can view information such as the freight document amount, ordering party's proposal, carrier's proposal, and dispute status..

- Sections

  You can view further details of the freight document in the following sections:

  - **Charges**

- Notes
- Attachments
- General Details

Worklist (Manage Disputes)

To restrict the number of disputes displayed, you can use the preconfigured worklists (New, To be Approved, Submitted, Resolved, and All) that are based on the dispute status.

All

The All worklist displays all disputes. You can view the following information for each dispute:

- Dispute

  Displays the dispute ID, billing type (self-billing or carrier invoice), ordering party's proposal, and number of open disputes. Note that when there are one or more open disputes and you choose the number of open disputes, you can quickly view the details of disputed charges.

- Freight Document

  Displays the freight document ID.

- Invoice
- Ordering Party

  Displays the ordering party details.

- Customer Account

  Displays the customer account ID.

- Arrival Location
- Departure Location
- Freight Document Amount

  Displays the original freight document amount from the ordering party.

- Carrier's Proposal

  Displays the gross amount for the freight document along with the disputes proposed by you.

- Ordering Party's Proposal

  Displays the gross amount for the freight document along with the disputes proposed by the ordering party.

- Open Disputes

  Displays the total number of open disputes

- Changed On
- Comments

  You can either add new comments or view or edit the existing comments in a dialog box that appears. The comments that you enter here are visible to the users internally within your organization.

- Document Status

  Displays whether the dispute is yet to be new, to be approved, submitted, or resolved.

- Purchasing Group

- Resolved Disputes

  Displays the total number of resolved disputes.

New

The New worklist displays all new disputes that you have created from freight documents but are still in progress and not yet submitted to the ordering party. The system displays the same information as the All worklist.

Submitted

The Submitted worklist displays disputes that you have newly created and submitted to the ordering party for approval. The system displays the same information as the All worklist.

To be Approved

The To be Approved worklist displays disputes that are yet to be approved by you. The system displays the same information as the All worklist.

Resolved

The Resolved worklist displays disputes from ordering party that have been resolved, that is, both the parties have converged on an understanding and resolved the differences. The system displays the same information as the All worklist.

In Error

The In Error worklist displays disputes that are in error. During the dispute resolution process, once the dispute is accepted, the system updates the freight order in your external system with the updated charges. If the update fails, then the external system sends a failed acknowledgment message. This message sets the dispute status as In Error and you can resubmit this dispute.

This worklist displays the same information as the All worklist.

Detail View (Manage Disputes)

The detail view of a dispute consists of a header and several sections.

Header

You can view the following important information about the dispute:

- General Details

  Displays the following information:

  - Freight document

    Displays the freight document ID.

- Contact details

  Displays the phone number, email ID, and address of the ordering party.

- Change history

  Displays the administrative information such as created by, created on, changed by, and changed on.

- Purchasing group

  Displays the purchasing group ID from your transportation system.

- Amounts

  Displays the following information:

  - Freight document amount

    Displays the original freight document amount from the ordering party.

  - Amount invoiced until now

    Displays the sum of invoiced charge lines.

- Carrier's proposal

  Displays the gross amount for the freight document along with the disputes proposed by you.

- Ordering party's proposal

  Displays the gross amount for the freight document along with the disputes proposed by the ordering party.

- Dispute status

  Displays the status of the dispute, that is whether it is New, Submitted, To be approved, Resolved, or In Error.

- Comments

  You can either add new comments or view or edit the existing comments in a dialog box that appears. The comments that you enter here are visible to the users internally within your organization.

Information

The information section displays the following details:

- General

  Displays the following information:

  - Dispute ID
  - Freight Document ID
  - Purchasing Group

- Administrative Data

  Displays the date and time the dispute was created and the details of the person who last modified the dispute and the time.

Reference Documents Section

Displays the document type and document ID of the reference documents added by you and your ordering party during the settlement process. Additionally, you can add a reference documents by choosing the add icon. Enter the document type and document ID of the reference document.

You can also download the reference document details in a spreadsheet. You can view the following details in this document:

- **Document ID**
- **Document Type Code**
- **Document Type Description**
- **Created On (UTC)**
- **Created By**

Charges

The following are the subtabs in the **Charges** section:

- **All**

  You can view all the charges in this subtab. Based on the type of the charge, you can view one of the following additional information for each charge description:

  - Unplanned Charge

    Displayed when the charge line is an unplanned charge.

  - Disputed

    Displayed when a charge line is in dispute.

  - Tax charge

    Displayed when the charge is a tax line.

  - Subsequent

    Displayed when the charge line is a subsequent charge.

- **Dispute**

  You can view all the charges from the dispute document in this tab. Based on the type of the charge, you can view one of the following subtexts for each charge description:

  - Subsequent

    Displayed when the charge line is a subsequent charge.

  - Unplanned

    Displayed when the charge line is an unplanned charge.

  Note that in some scenarios, there may be two additional information, for example, **Subsequent | Disputed**. This indicates that the charge line is both subsequent and disputed.

Each subtab displays the following information:

- **Charge Description**

Displays the charge type details for each stage in each freight document. Charge types are the classification of charges for which you charge the ordering party.

- **Charge Type (Transportation System)**

  Classification of charge line that indicates the type of charges such base rate, surcharge, or discount, as specified in the ordering party's SAP Transportation Management system.

- **Status**

  Displays the status of each charge line. The system displays the following statuses:

  - New
  - Disputed by carrier
  - Disputed by ordering party
  - Accepted by ordering party
  - Rejected by ordering party
  - Rejection accepted by carrier
  - Accepted by carrier

- **Rate Amount/Unit**

  Displays the flat rate amount or rate amount per unit. You can modify the flat rate amount or rate amount per unit, for example, USD 20 per 1 kg.

- **Quantity**

  Displays the total quantity relevant for calculating the final amount.

- **Final Amount**

  Displays the final amount that has been derived from the rate amount, quantity, and calculation method.

  Note that the system does not automatically perform charge calculation. If you manually change the rate amount, you must also change the final amount and vice versa.

- **Dispute Reason**

  For disputed charge lines, you must select one of the following reasons for dispute from the drop-down menu:

  - Other – Specify
  - Unplanned Cost
  - Rate Mismatch – Unplanned Rate Change by Carrier
  - Rate Mismatch – Based on Quantity Lookup
  - Rate Mismatch – Rate Not Yet Updated in Shipper TM Rate Master
  - Rate Mismatch
  - Distance Correction
  - Weight Correction
  - Volume Correction
  - Quantity Correction

- Rate Mismatch and Quantity Correction
- Rate Mismatch and Distance Correction
- Rate Mismatch and Weight Correction
- Rate Mismatch and Volume Correction
- Dependent Line

When you select the **Add Charge** button, the system adds a new charge line.

Note that you can toggle the display between all charge lines and only disputed charge lines.

When you select a charge, you can view the following additional details specific for the selected charge:

- **Transportation Charges**

  You can view the charge details such as line number, charge type, calculation methods, and payment terms.

  - **Line Number**
  - **Charge Description**

    Displays the classification of charges for which you charge the ordering party. These are the transportation mode-specific codes that are predefined by SAP Business Network for Logistics.
  - **Calculation Method**

    Displays the logic with which the system calculates the charges.
  - **Payment Terms**

    Displays the conditions of payment you agreed with your ordering party with respect to goods supplied or services provided.
  - **Logistical Reference**

    Displays the item or stage information for a charge line (for container, package, product, or stage) from which the system obtains the logistical data.
- **Calculation Basis**

  Displays the actual base or factor with which the system calculated the charges. You can view the calculation basis for rates belonging to a rate table.
- **Exchange Rates**

  Displays the exchange rate information that is used as the basis for currency conversion.
- **Notes**

  Displays the notes specified for the charge line.

Note that you can accept, reject, or propose changes for each charge line disputed by the ordering party. Note that when you reject an ordering party's proposal, you must enter a rejection reason for the same.

Notes

You can enter information about the dispute in this section. The ordering party can view the information you enter in this section.

ℹ Note

Notes are intended to provide additional information related to the business document or business process. You're recommended to avoid entering sensitive personal data.

Attachments

You can add attachments in this section. The ordering party can view documents you attach in this section.

ℹ Note

You can attach documents related to the business document or business process in this section. You're recommended to avoid attaching sensitive personal data.

You can only upload files that fulfil the following criteria:

- Files must be of one of the formats: jpg, gif, png, .pdf, .doc, .docx, .xls, .xlsx
- Image files must be less than 6MB file size
- Document files must be less than 5MB file size
- File name must be less than 150 characters including file extension

General Details

In this section, you can view the freight document details. The system displays the transportation details (total distance, total duration, vehicle resource), locations involved (including dates and addresses), and administration information.

Creating and Reviewing Disputes from Ordering Party

You can create disputes against the freight documents for self-billing for additional unplanned freight costs. To create a dispute case, you can use the **Review Freight Documents** app. Once the system creates a dispute, you can view this document in the **Manage Disputes** app.

For more information on creating a dispute, see Creating a Dispute.

In the **Manage Disputes** app, you can view all the newly created disputes that are yet to be submitted in the **New** tab. You can navigate to the dispute details and propose changes in the **Charges** tab. You can newly add a charge line for an additional charge encountered during the transportation or you can propose a change in an existing charge line.

ℹ Note

It is highly recommended that when you change the rate amount, quantity, or final amount, you also change the others accordingly.

If the disputed charge line is reference to any other charge line, you must manually update the rate amount, quantity, and final amount of the referenced charge lines.

You can choose to save your changes and submit them later. When you have saved the changes and not submitted the dispute yet, you can choose to either cancel the changes or delete the entire dispute document. Once you submit the document, you cannot delete the dispute document.

When you submit your changes to the ordering party, the system changes the status of the dispute document as **Submitted** and moves it to the **Submitted** worklist.

The ordering party can accept or reject your changes or propose another change and submit the dispute back to you.

Based on the action performed by you or the ordering party, the system displays the following document statuses in the header area:

- New

  This status appears when you have newly created a dispute document.

- To be approved

  This status appears when the ordering party has taken an action on the disputes raised by you and submits it back to you for your approval.

- Submitted

  This status appears when you submit your disputes to the ordering party for approval.

- Resolved

  This status appears when both you and the ordering party have converged on an understanding and resolved the differences.

Based on the action performed by you or the ordering party, the system displays the following statuses at the disputed charge line:

- Disputed by carrier

  This status appears when you propose a change in an existing charge line or added an unplanned charge.

- Disputed by ordering party

  This status appears when the ordering party proposes a change on a charge line disputed by you and submits the dispute back to you. You could either accept the ordering party's proposal or propose another change. When you accept the proposal, the system changes the status of the charge line as **Accepted by carrier**. When you propose another change, the system changes the status as **Disputed by carrier**.

- Accepted by ordering party

  This status appears when the ordering party accepts the dispute proposed by you and submits the dispute back to you. When all the disputed lines are accepted by the ordering party, then the dispute document is set to status **Resolved**. You do not have to take an action on the resolved charge lines.

- Rejected by ordering party

  This status appears when the ordering party rejects your proposal and submits the dispute to you. Note that when the ordering party rejects your proposal, you can either accept the rejection or propose another change. When you accept the rejection, the system changes the status of the charge line as **Accepted by carrier**. When you propose another change, the system changes the status as **Disputed by carrier**.

- Rejection accepted by carrier

  This status appears when the ordering party rejects your proposal and you accept the ordering party's rejection.

- Accepted by carrier

  This status appears when you accept the ordering party’s proposal and submit the dispute to the ordering party.

ℹ Note
