Cookbook	Product Workzone	How-to guide that includes supported processes and mapping instructions.	FC, Descartes	Internal

Coneksion (transacting collaboration)

Integrated with SAP Business Network for Logistics, this solution simplifies carrier connectivity by automating ocean freight data exchange—from bookings to tracking and invoicing. It eliminates complex integrations through a carrier-neutral platform powered by Coneksion's CCL (Common Carrier Layer) technology, reducing IT effort for SAP user companies.

Carrier Onboarding

Carrier onboarding is one of the key workstreams in every BN4L implementation and represents several milestones starting from carrier data collection, network adoption strategy, communication, tenant creation and post go live support.

Shipper and Carrier-Facing Material				
Material Name	**Content Location**	**Brief Description**	**Scope**	**Classification**
Carrier onboarding kick off and deep dive templates	CoE SharePoint	Customer facing kick off and deep dive templates.	FC, GTT	External
RACI	Knowledge@Ariba	Carrier onboarding-related project milestones and associated responsible, accountable, consulted and informed parties.	FC, GTT	External
Carrier data upload guide	Knowledge@Ariba	Process of uploading carrier master data onto SAP Business Network for Logistics shipper tenant (PROD). Carrier data upload and submission is a mandatory prerequisite for SAP-managed carrier outreach.	FC, GTT	External
Carrier data protection	sap.com	Cloud services agreements.	FC, GTT	External
Communication templates	Knowledge@Ariba	Project Notification Letters and Go Live Letter templates that customer can modify and send to carriers to level set the expectations.	FC, GTT	Internal
SAP carrier outreach service	Knowledge@Ariba	Scope of SAP Trading Partner Services (TPS) team during the carrier outreach, including following areas: Carrier Onboarding, Prerequisites & Best Practices,	FC, GTT	External

		Methodology & Timeline, Onboarding Process Flow.		
Carrier summit recording	ON24	Pre-recorded webinar for carriers to understand the BN4L benefits, collaboration methods, onboarding steps and support channels.	FC, GTT	External
Carrier summit deck	Knowledge@Ariba	Deck presented in carrier summit webinar to understand the BN4L benefits, collaboration methods, onboarding steps (in production) and support channels.	FC, GTT	External
Carrier PROD onboarding guide (new registration flow from 1st June 24)	Knowledge@Ariba	The guide describes production tenant creation process for carrier at SAP Business Network for Logistics. It contains instructions for both net new carrier and existing network carrier as well as FAQ.	FC, GTT	External
Carrier TEST onboarding guide	Knowledge@Ariba	The guide describes test tenant creation process for carrier at SAP Business Network for Logistics. It contains instructions for both net new carrier and existing network carrier as well as FAQ.	FC, GTT	External
Multi-entity carrier onboarding	Knowledge@Ariba	General recommendations and limitations for onboarding of multi-entity carriers onto SAP Business Network for Logistics.	FC, GTT	External
How to update LBN ID in shipper back end system	Official product documentation	LBN ID mapping in customer back-end system as a prerequisite for seamless data flow on BN4L between shipper and carrier.	FC, GTT	External
Go live cutover checklist	Knowledge@Ariba	This cutover checklist can be used for all BN4L projects where a carrier onboarding is required. The file lists all important activities (e.g. mapping, change management) that need to be complete prior a business go live to ensure proper data flow and seamless collaboration.	FC, GTT, project44	External

Internal Material				
Internal SharePoint dedicated to carrier onboarding	CoE SharePoint	Central repository for all carrier onboarding material (internal and external)	FC, GTT, project44	Internal
Onboarding process flowchart	Knowledge@Ariba	This internal document describes carrier onboarding processes in a flowchart.	FC, GTT	Internal
FAQ for SAP NSL (shipper facing role)	CoE SharePoint	Questions and answers related to carrier onboarding process from a carrier perspective.	FC, GTT, project44	Internal
FAQ for SAP TPS (carrier facing role)	CoE SharePoint	Questions and answers related to carrier onboarding process from a shipper perspective.	FC, GTT	Internal
DMC carrier matching process	CoE SharePoint	Describes the BN4L carrier matching process and lists useful links	FC, GTT	Internal
Project management guide for NSL	Knowledge@Ariba	This guide was created for Network Services Leads (NSL) who are about to start their first or new trading partner enablement project on SAP Business Network for Logistics. It provides step-by-step instructions on how to start the project from the day one until end of hyper care. The guide contains also specific instructions and milestones for projects with visibility provider project44 in scope.	FC, GTT, project44	Internal
Support model for implementation partners	Knowledge@Ariba	Support model for SI partner who supports a customer with the implementation of SAP Business Network for Logistics.	FC, GTT, project44	Internal
NSL and TPS roles and responsibilities	Knowledge@Ariba	Roles & Responsibilities between Network Deployment/Enablement Leads and Onboarding Specialists during Carrier Onboarding process.	FC, GTT	Internal
End-to-End carrier onboarding and	Knowledge@Ariba	Legacy carrier onboarding process (via SAP Store) on SAP Business Network for Logistics	FC, GTT	Internal

troubleshooting process		supported by SAP Trading Partner Specialists.		
B2B carrier integration advisory working instructions	CoE SharePoint	Set of work instructions for internal SAP Business Network Integration advisors on how to navigate Atlas while managing carrier integration advisory service.	FC, GTT	Internal
How to use MS Form to collect and validate carrier data	Knowledge@Ariba	Introduction of MS Form as one of the options how a shipper can collect their carrier contact details and/or preferred collaboration method for carrier onboarding on BN4L. The aim is to ensure that the initial carrier communication (e.g. project notification letter) and SAP outreach emails are sent to a right carrier POC.	FC, GTT	Internal

Carrier Enablement

Carrier enablement materials help carriers to understand how to administer their tenant and transact with their carriers.

Administration				
Material Name	**Content Location**	**Brief Description**	**Scope**	**Classification**
Carrier administrative training (playlist)	Official product documentation	Carrier-facing videos that enable carrier to administrate their tenants. Two playlists with slightly different content are available depending on when the tenant was created.	FC, GTT	External
How to proceed with business configuration in carrier tenant for FC	Official product documentation	Administration guide describes the steps carrier needs to perform as an administrator to set up, configure, and administer BN4L tenant.	FC	External
How to proceed with business configuration in	Official product documentation	Administration guide describes the steps carrier needs to perform as an administrator to set up, configure, and administer BN4L tenant.	GTT	External

carrier tenant for GTT				
Best practice in managing user accounts in carrier tenant for FC	Official product documentation	Instructions for a tenant admin on how to add and manage users.	FC	External
Best practice in managing user accounts in carrier tenant for GTT	Official product documentation	Instructions for a tenant admin on how to add and manage users.	GTT	External
Transaction Processing				
Carrier functional training (playlist)	Official product documentation	Carrier-facing videos that explain carriers how to transact with their customers (shippers) via BN4L tenant.	FC	External

Carrier Integration

Once carriers get their web portal (tenant) some of them may be interested in B2B carrier integration. This means carriers will connect their back-end system with their network tenant and automate all or some transactions with particular customer (shipper). This is a preferred approach of high-volume carriers which have no capacity to manually process tenders/orders etc. in their network tenant.

Generic Content				
Material Name	**Content Location**	**Brief Description**	**Scope**	**Classification**
API vs EDI	SAP Community	Things to consider, pros/cons.	FC, GTT	External
How can shipper map customer codes using Assign Codes App	SAP Community	Explain how Assign Codes app in shipper tenant can help carriers to deal with custom codes that represents things such as shipping types, unit of measures, packaging types, etc.	FC, GTT	External
