Standard Code Lists – For A Standard Integration

SAP TM is very configurable

- Shipper's can define their own code list values – Not good for carrier side integration
- Shipper's can map to standard code values using Assign Codes app found in Shipper side of BN4L

SAP Defines standard codes that carrier's can build integration's against

- LBN Code List Help Page
- Make sure your shipper is using the standard codes!

Integration Implementation Phases - guidance only

- Schedule kick-off call
- Provide generic integration samples
- Confirm business requirements
- Confirm scope & connection setup
- Define milestones & timelines

- Setup connection in test environment
- Test scenarios defined
- Sample order/invoice to confirm connection

- Review mapping requirements & identify if development is needed
- Utilize self testing options
- Test all documents in scope
- Validate test documents pass processing & all information is correct
- Validation testing has been completed

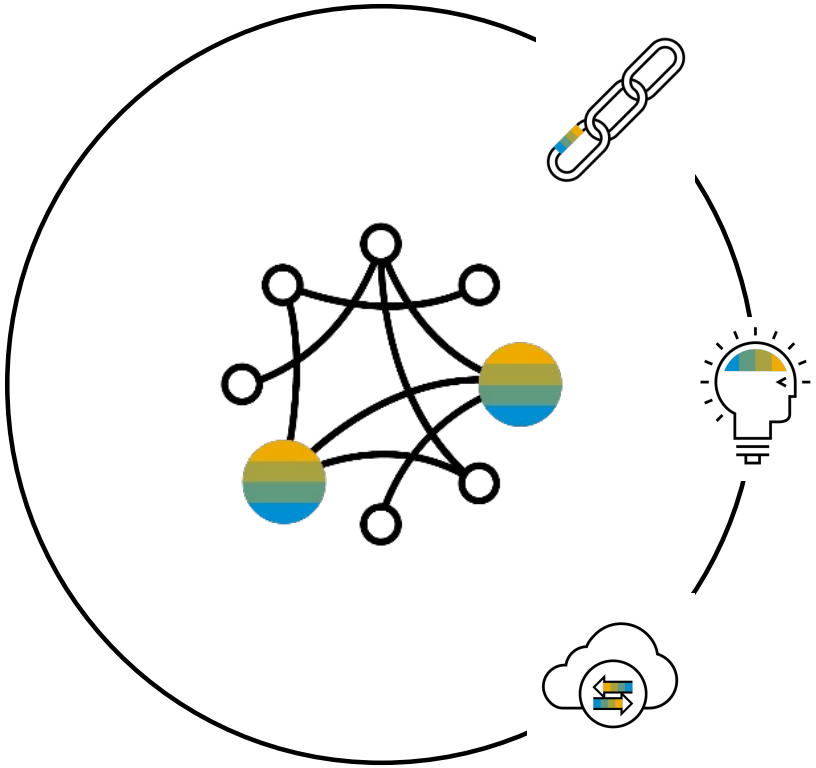

- Establish production integration connection
- System configuration
  - Migrate maps to production
  - Setup users & permissions
- Go live
