Steps to Get Integrated

Test Environment

1. *Receive invitation from your shipper and* register your TEST tenant. *(completed during Onboarding process)*
2. Configure profile, user etc. *(completed during Onboarding process)*
3. Request test tech user by raising incident via SAP Support Portal with component SCM-LBN-INT mentioning LBN ID. (procure an Oauth 2.0 client ID and secret for carrier to call LBN API) *(completed during Onboarding process)*
4. Use these Login BN4L, maintain endpoints that BN4L needs to postman sample payloads to build mappings and endpoints.
5. Setup inbound connections and outbound connections via documentation and Reference video.
6. Testing - generate test call from system connection app via document.
7. Test with Shipper to ensure integration coverage for their use cases

Production Environment

1. Shipper/SAP to invite carrier, or carrier directly requests prod tenant sending mail to sap.dsc.network.enablement@sap.com providing info: company name, contact email, address, phone, SCAC if applicable.
2. Step 2 - 6 remain same as have done in test environment.

To obtain support, post questions/issues here this repository.

Steps in detail here.
